

General EU Declaration of Conformity

Lockers

The objective of the European Single Market is to facilitate the free movement of goods and services. The Directives and Regulations of the European Union (EU) stipulate basic requirements for safety, health, environmental compatibility and energy efficiency for certain products, and the CE marking certifies compliance with these requirements.

Our lockers only come with a CE marking if they are fitted with electrical components that were not originally designed for this application. It is prohibited to affix the CE marking to products which are not subject to this requirement.

We hereby declare under our sole responsibility that the products listed below comply with the European directives and standards stated.

Product designation (item numbers)	Directives / Standards
Classic (80...)	DIN 4547-1:2012-04
Evoló (48... / 49...)	DIN 4547-2:2012-04
Cambio (45...)	AfPS GS 2019:01 PAK
Prefino (46...)	

Product designation (item numbers)	Directives / Standards
Basis PLUS (088...)	DIN 4547-1:2012-04
Classic PLUS (080...)	DIN 4547-2:2012-04
Evoló PLUS (049...)	AfPS GS 2019:01 PAK
	NF D 65-760-1
	NF D 65-760-2
	NF D 65-760-3

Our entire range of electrified lockers, without exception, meets the EU requirements on electrical safety. All cabinets that do not have a dedicated CE marking comply with the following directives or guidelines:

- **Supplementary Guidance on LVD/EMCD/RED**
- **2011/65/EG RoHS 2**
- **1907/2006 REACH-VO**

Breidenbach, 11/08/2023

Andreas Gutermuth
