

Evolo 48

For contract furnishing.

Evolo 48

Lockers & assembled box lockers.

Evolo by C+P has permanently changed the design of changing rooms. With clean lines and elegant MDF or HPL decor fronts, Evolo opens up possibilities that remain closed to conventional cabinets. The timeless design combined with an excellent price-performance ratio makes the locker system the ideal choice for modern changing rooms.

Particularly attractive: the optional decor fronts give the cabinet a special look. And it's not just the look of Evolo that's convincing – the program is also well-equipped technically with well-thought-out ventilation and drying solutions.

Increased anti-burglary protection thanks to extremely warp resistant doors!

This is ensured by closed profiles on the sides. The doorstop silencers are a standard feature.

Custom-made for specific applications.

Ergonomically designed turning bolt latch:
With door protection (standard) for lock bolt size 6–8 mm.

Feet made of plastic for optimum corrosion protection:
They consistently underpin the linear design and have a protective sleeve that covers the adjusting screw when the optional height Adjustment is used. An ingenious feature!

Optional integration of numbering: With self-adhesive film in the embossed label holder (optional).

Exchangeable fronts:
(can also be retrofitted!)
Choice of steel or decor doors (MDF or HPL).
Door opening limiters are a standard feature with decor doors.

Double coat hooks:
For ease of operation, with integrated space for coat hangers.

Easy-to-clean ventilation hole pattern: Thanks to the smooth outer front (no protruding louvers).

Drying and ventilation for maximum efficiency

The Evolo ventilation concept:

It ensures effective ventilation and drying of clothing with steel doors. Thanks to its air flow behavior, it works without additional Ventilation equipment. Uniform ventilation of the entire interior is guaranteed even in lockers with bases (see graphic)!

The air inlet in the rear bottom of the locker ensures sufficient ventilation and drying in the compartment (see graphic). In lockers with bases, ventilation is ensured via openings above the recessed base.

ZBL

forced ventilation

Our ZBL technology: high air exchange rate through connection to on-site ventilation systems.

- + Improved drying and odor removal
- + Used, for example, in industrial plants or in food processing
- + Extraction is carried out by the customer's ventilation system (preferably with a heat exchanger to reduce energy loss)
- + For optimal ventilation, an air renewal rate of 8 to 10 times per hour is recommended

Lockers

- + Increased anti-burglary protection thanks to extremely warp resistant doors
- + Sturdy steel construction with high-quality enamel coating
- + 2 compartment widths, 5 different box heights
- + Sub-frame alternatively with feet, base, storage box, or bench
- + Ventilation ensured by EVL (Evolvo Ventilation Concept)
- + Doors hinged right, borne on hinge pins, with easy-to-clean hole pattern and embossed label holder for optional integration of numbering
- + Convenient doorstop silencers for pleasant closing behavior
- + Decor doors (MDF and HPL) with door opening limiter as standard feature

The C + P safety turning bolt cannot be overwound because it "spins" when it is closed, thus preventing tampering!

The cylinder lock engages only when the padlock is removed, and the door can be opened simply by turning the knob.

For bolt lock size

6-8 mm. Standard in all Evolo lockers!

Accessories for lockers

The Evolo range of accessories offers:

The difference lies in the details! C+P offers a multitude of practical additional fittings and upgrading components. For you this means:

- + All requirements can be met for a customized result
- + Lockers „made-to-order“ for the specific location
- + All parts can be ordered separately (no additional charge packages, you only pay for what you need!)
- + Many parts can also be retrofitted
- + Excellent price-performance ratio thanks to C+P modular system

Wet room design*

0002-14

Play it safe – with the new standard C+P safety turning bolt

The problem

Conventional turning bolt latches are highly susceptible to break-ins because the latch can be overwound.

The burglar uses the padlock as a lever (the longer the shackle, the greater the leverage). Overwinding destroys the locking mechanism and opens the way to the locker compartment.

The C + P solution

The C + P safety turning bolt cannot be overwound because it “spins” when it is closed, thus preventing tampering!

The cylinder lock engages only when the padlock is removed, and the door can be opened simply by turning the knob. For lock bolt size 6-8 mm.

Turning bolt latch and cylinder locks not for assembled box lockers

For **PIN code** and **RFID locks**, there are a variety of options and solutions available to suit all customer requirements.

Thanks to decades of experience and close cooperation with just about every locking system manufacturer, C + P's knowledge across the entire breadth of applications is unmatched.

From simple code locks to networked security compartment systems to interactive assembled box locker solutions in the SmartLocker sector, we're always able to offer the right solution to any requirement.

Please contact our specialist consultants!

Combination and deposit locks

For the WF 1401 model for fixed users, the code is automatically blurred after each use but remains stored. For the WF 2112 model for changing users, the code is reset before each use and manually blurred by the user..

No surcharge!

With the C + P color concept, 144 color combinations are available at no additional charge.

For body colors of color group 0, all front colors of the color concept are available with no surcharge.

Lots of color, not a lot of money.

For body colors of color group 1, the additional charge for color is 15%.

This enables you to make exciting worlds of color a reality without putting too much strain on your budget.

Special colors? Absolutely!

Paint finishes in all RAL colors outside the C + P concept are also possible.

The color surcharge for this is 25% (minimum order: 5 lockers).

Subject to technical testing and availability.

Feel free to send us your requests.

Important notes:

These color charts are intended solely as a guide to the approximate impression of the colors. For more exact color representations, please consult the RAL color chart or the original samples. Colors are subject to deviation and do not constitute grounds for complaint. We cannot accept any liability for printing and representation errors or flaws. All depicted decors, colors and surfaces are available as standard. Other versions (e.g., for contract furnishing) are available on request. The color surcharge system on page 48/49 applies only to furniture where the body and fronts are each coated in a single color. For other variants (e.g., different front colors on the same cabinet), please let us know your specific project details. Please note that various product groups have their own selection of colors and are not coated according to the C+P color concept. You can recognize the respective products by the individual color information provided on the respective pages of the catalog. Underframes are supplied in black gray as standard. We always coat shelves, hanging frames etc. in light gray, unless otherwise specified in the product series. Zinc-plated shelves are uncoated. For the color RAL 9006 White Aluminum, the RAL Institute has no uniform template and definition so that, despite having the same name, there may be color differences when compared to other materials, previous production batches, different coating procedures or third-party products.

C + P decor fronts

- + HPL (high-pressure laminate) is available with a classic wood look or in single colors.
- + HPL is scratch-proof, non-porous and impresses with its high stability.
- + The door is 100% moisture-resistant and features outstanding hygiene properties!
- + MDF (medium-density fiberboard) decors are also available.

Evolò 48
Body: RAL 7016 anthracite gray
Doors: Sereno oak

Evolò 48
Body: RAL 7016 anthracite gray
Doors: Natural silver spruce

Decor fronts (MDF)

With 18 mm black edging

Solid-core decor fronts (HPL)

With 13 mm black solid-core edge

Important note:

All of the specified decors within a top type are available with no surcharge!

The birch gray VK 741 decor is similar to light gray.

The core of the HPL top is always black.

General information:

This publication is for information purposes only. It is not an offer in the legal sense and is intended exclusively for business customers. All items are supplied without the decorations that may be shown. The brand and product rights of any branded articles recognizable in the decorations are held by the respective manufacturer. The dimensions given are approximate and may vary upwards and downwards. We reserve the right to make design changes, changes to the product range and the ability to deliver, changes to the color, fabric and decoration palettes and, if necessary, limited express availability (e.g. in the case of larger quantities per model or order). We also reserve the right to make changes to price quotations, e.g. due to errors, increases in material or raw material prices. Our General Terms and Conditions apply (see www.cp.de/agb).

Issue: 2024/01 - Valid from 01.01.2024 until a new issue is published.
