# What kind of added value does C + P offer to retailers?

## Catalog

The new catalog provides retailers with a digital tool. Prices are updated automatically from a database, ensuring that the contents are up to date. The chapters can be flexibly compiled using our catalog configuration tool based on the customer's wishes and the respective subject area. The digital version itself can also be generated with branding (logo and project name) free of charge. Internal links guide the user through the world of C + P products.

## Website

Our new website offers retailers quick and easy processing. This makes custom price inquiries possible and rebate information available via retailer login. Orders are entered digitally and processed automatically.

## Trade shows

C + P exhibits at a large number of trade shows. We also offer retailers roll-ups and advertising materials for ideal sales support. We'd also be happy to provide support through our sales team.

## Brochures

In addition to our catalog, we also provide our customers with product-specific brochures. This allows us to cater to target groups and applications in particular, so as to present our products in a more detailed way.

## Sales team

Our sales team provides support for project inquiries, product listings and customer catalog designs both digitally and on site. C + P is also represented internationally by competent contact partners.

**Follow us on social media:**  
C + P Möbelsysteme GmbH & Co. KG  
cp\_derstahlschrank

Heinze is Germany's leading portal for building products, company profiles and architectural projects.

C + P Möbelsysteme is represented with tender specifications on all products here. Printed documentation can also be ordered directly through Heinze by logging in.

Oxomi is a platform for marketing and product information. It connects associations, retailers and industry.

C + P Möbelsysteme is a member of OXOMI. Retailers can download our current documentation, such as price lists, the catalog and guidelines, at this portal.

## BMEcat

BMEcat is a standardized exchange format for electronic product catalogs and multimedia catalog data between suppliers and customers. "BME" stands for the "Bundesverband Materialwirtschaft, Einkauf und Logistik e. V." (German Federal Association of Materials Management, Purchasing and Logistics), one of the initiators.

A comprehensive selection from the C + P range can be provided for further use electronically. For this purpose, we can make the corresponding data available in the customary BMEcat format or, if desired, as a CSV file.

The benefits to you:

- + Save time/money through data transfer
- + Comprehensive item information in a file, incl. the associated image data for download
- + The probability of error is reduced both here and during the subsequent ordering process.
- + Up-to-date product prices and data, which improves master data quality

### Our image database is also available:

Following a brief registration, you'll be able to download images of our products in all common colors from our image database. These are excellent-quality images which can be used by you accordingly. Three different resolutions are available here: low, medium and high.

# C+P

## A brief portrait.

The Christmann + Pfeifer (C+P) company was founded in Breidenbach in the state of Hesse in Germany in 1925, making it nearly 100 years old. In addition to the company headquarters, production locations of C+P currently include factories in Gotha, Thuringia and Legnica, Poland. We've compiled key facts and figures on the company in a brief overview for you here:

## C+P by the numbers:

<b>Founded in</b>	1925
Employees at C+P Einrichten	Around 650
Production sites	Breidenbach (Hesse, Germany) Gotha (Thuringia, Germany) Legnica (Poland)
Sales	Worldwide
Production capacity	Over 100 truck loads leave C+P factories every week
Material volume	C+P plants process around 1,000 metric tons of steel every month
Orders	C+P handles over 65,000 orders per year, from individual items to entire furnishings for major projects
Claim to fame	<b>Specialist and market leader in steel furniture</b>

# Long service life through tradition!

Since its founding, C+P has developed countless product innovations together with its customers and successfully brought them to market. A lot's changed since then, but one constant has always remained the same: the level of quality which became the trademark of C+P long ago. It's reflected in the entire process chain, from material purchasing to production and painting to the delivery and installation of our products.

## Trusting is good...

...but it's better to check. As least as far as quality assurance is concerned. This is precisely why both our production processes and C+P products themselves are subjected to extremely demanding quality management based on two pillars: our company-internal test laboratory on the one hand and, of course, regular external inspections and checks on the other.

## Our certifications:

Quality management  
ISO 9001

Energy management  
ISO 50001

Environmental management  
ISO 14001

Certification →

Many of our products have been tested by TÜV Thüringen GS (Thuringia Technical Inspection Agency). We would be happy to send you copies of the relevant certificates if required.

HPQR  
certificate

EcoVadis  
certificate

# Suitable solutions for EVERY industry.

Across the globe, thousands of specialist dealers, companies and institutes trust furniture solutions from C+P—from craftsmen’s businesses to large industrial corporations. A crucial reason for this is that C+P products aren’t one-size-fits-all solutions. Instead, they’re always oriented toward the specific requirements of the industry in which they’re used. This already starts with the planning phase.

## Our expertise is your advantage!

Each and every one of our customers benefits from the nearly 100 years of experience boasted by C+P in the planning and implementation of furnishing projects in a wide variety of different economic sectors. Our sales department is familiar with the specific nature of different industries, which is why it knows exactly what it all comes down to— both when selecting custom-tailored products & suitable equipment and during the overall implementation later on.

# PCon

## Planning support.

Whether it's office furniture, changing rooms, workshop equipment or outdoor transfer stations: We have a solution for everything! Our project planning team creates specific plans according to your needs. In special cases, measurements are taken and details on the rooms are clarified so as to avoid obstacles and interfering factors during the furniture planning process. Virtual scanning allows the rooms to be transferred directly into a 3D model which can be provided to the project planner.

### Individuality & product configuration

Using the pCon OFML data, all C+P Möbelsysteme product groups can be individually designed and precisely planned in your floor plans by our project planners. More than 24 standard colors, 4 MDF and 8 HPL decors are available for the decor front area and 8 MCPB and 4 HPL decors for office furniture. Naturally, additional RAL and decor colors can be requested and provided. This means that furniture personalization is of paramount importance here. Configure, visualize and download your product using our website or the pCon.planner/pCon.box.

# Responsibility for people and the environment.

Social and ecological sustainability have always characterized C+P's conduct and economic activity. We also accept that we serve as an example of a market-leading company here. This being the case, we're always working on meeting this major responsibility continually and to the best of our ability in every area. Some of the ways we're making this happen:

- + **Production in the heart of Europe**  
following high social standards
- + **Long-lasting, recyclable products**  
with a service life lasting  
multiple decades
- + **We do without packaging  
material to a large degree**  
through our own special logistics
- + **Environmentally friendly painting**  
thanks to solvent-free and  
low-emission coating processes
- + **Enduring customer relationships**  
thanks to optimal reliability  
and quality

## Outstanding sustainability

At the end of 2022, C+P was awarded the silver medal for sustainable economic activity by the renowned "EcoVadis" rating agency.

Quality on the highest level—from the products to the processes. C+P has been certified in the areas of

- + quality management (ISO 9001)
- + environmental management (ISO 14001) and
- + energy management (ISO 50001)

by the Deutschen Managementsystem Zertifizierungsgesellschaft mbH certification company. This ensures consistently high quality in every area and process.

This was preceded by an intensive and demanding evaluation of our conduct in the areas of "environment," "employment and human rights," "ethics" and "procurement." The internationally recognized sustainability standards of the Global Reporting Initiative, the UN Global Compact and best practice guideline ISO 26000 were applied here.

## The material of steel: A sustainable all-rounder!

Steel forms the basis of all our products. No other material boasts as many positive features when it comes to stability, design and the long-term value of storage area furnishings. Add to this the fact that steel makes an important contribution to resource conservation. The material can always be melted down again and processed for new purposes without any loss in quality. Incidentally, half of all steel in Germany is already being produced from this secondary raw material.

Warranty →

### Steel furnishings are

- + extremely sturdy and resilient
- + extremely long-lasting
- + able to be moved any number of times
- + up to 100 percent recyclable
- + available in the latest designs
- + available in any color
- + combinable with other materials
- + easy to care for and especially hygienic
- + fire protection in practice

Our high-quality steel furniture comes with a **10-year warranty!** The C + P warranty conditions can be found at [www.cp.de/en/complaint-1-1/](http://www.cp.de/en/complaint-1-1/)

# Innovation with a vision.

Innovations from the C+P brand are never gimmicky—they always pursue clear goals: making working life easier, increasing comfort and well-being, making processes more efficient and, most importantly, ensuring sustainability! This is why our developers are always thinking 1 or 2 steps ahead when carrying out their work, for example:

Less is more!

## BIONIC steel frame

For the new PLUS-series steel locker, C+P developed a design form which sets new standards in stability and resource conservation. The models of the series are reinforced in a targeted way in crucial places and feature a sophisticated internal structure consisting of folds, braces and intermediate spaces—similar to the leaves of a tree. The result is increased torsion resistance with less raw material and resource consumption.

New world of working?

## SmartLocker!

With the C+P SmartLocker, we've developed storage area furnishings which—unlike conventional solutions—are no longer content being a passive place for storage. Indeed, it rises to the occasion as a true asset at its place of use. Digitally controllable and networked, suitable for just about any desired customization and exuding timeless elegance, the SmartLocker creates solutions for the requirements of the modern world of working—both today and tomorrow!

# Designs with distinction.

For decades, the classic design of our steel furniture has shaped the appearance of countless commercial spaces around the world. Thanks to their rugged elegance, several different C+P lockers became true design icons long ago. Nevertheless, C+P products remained—and still remain—in touch with the times, such as the new PLUS-series steel locker and our SmartLocker digital locker system. As an aside, the latter was distinguished with the internationally renowned German Design Award and the iF Design Award in 2023.

**Environmentally friendly and fair**  
The C + P loading system makes packing our furniture unnecessary, and the transport material is reused. This conserves raw materials and prevents the creation of all sorts of waste.

# Logistics with Service PLUS

Long ago, it became yet another element of advertising for our company: **C+P logistics. With 40 of our own trucks and 80 furniture trailers in all it ensures the on-time delivery of our steel furniture reliably, safely and in an environmentally friendly way.**

## Reliable and on time

C + P's in-house scheduling department plans our deliveries from a central location, in a customer-oriented way and using the fastest possible routes. Direct shipping means there's no need for any transshipment.

This saves time and avoids potential sources of delay.

## Safe and protected

Thanks to our proprietary loading system, our products are protected from any damage throughout the entire shipping process.

Our specially trained drivers and installers work extremely carefully and personally ensure flawless delivery of the furniture.

## Comprehensive service

As standard, we deliver to our customers over direct routes, on coordinated delivery dates and with no shipping charges. This also includes advance notification of the exact delivery time.

A whole host of optional additional services are also available to you—up to and including full installation of the furniture.

# Steel lockers that get there safely Quickly and reliably.

As one of the few manufacturers in our industry, C+P has its own vehicle fleet. 40 of our own trucks and 80 furniture trailers ensure delivery which has been delighting our customers for decades. Our in-house centralized scheduling department plans our order volume in a customer-oriented way.

Our own vehicle fleet is supplemented by 15 permanent partner shipping companies. All vehicles comply with the Euro 6 standard. Trailers generally feature a lifting platform for conveying the lockers to you safely.

Our in-house scheduling department handles customer requests.

[www.cp.de/en](http://www.cp.de/en) →

C+P trailer with lifting platform

The team in Breidenbach is proud of the new fleet of trucks.

## The advantages of C + P logistics

- + Just about everywhere in Germany and in many countries in Europe, we carry out delivery directly to the desired unloading point using our own fleet of trucks and without any transshipment. That's why we don't need to use any packaging material and can avoid waste.
- + Trained loaders, drivers and installers know "their" products and handle them carefully.
- + You can expect on-time and professional delivery, which saves time, money and your nerves.

# The C + P logistics concept

If you do not specify any special wishes with the order, the standard conditions of delivery will apply. We deliver FREE OF CHARGE TO THE GROUND FLOOR in Germany (behind the first lockable building door).

## General requirements

Truck deliveries generally only take place on weekdays (Monday through Friday) from around 8 a.m. to 5 p.m. For all scheduled event types, the minimum delivery time established on the day of order clarification must be taken into account.

### **Applies within the Federal Republic of Germany.**

This does not apply for islands, locations inaccessible by private transport or downtown areas and streets blocked off to truck traffic.

### **Parcel delivery**

Items which can be delivered as parcels are packaged properly and shipped at a reasonable flat rate.

### **Environmentally friendly delivery**

Shipments transported by truck are generally unpackaged.

### **Note on service packages B1 through M1**

Existing elevators, doors, passageways, ceiling heights and paths must be large enough and safe. No spiral, marble or wood staircases.

### **For truck delivery**

The unloading point must be accessible by a large semi-trailer (18 m). Ability to park in the immediate vicinity.

### **Size examples:**

### **Notice**

A location is considered accessible if it can be reached by a wheelchair user without the aid of anyone else.

## Service scope

### Truck delivery within Germany

DELIVERY FREE OF CHARGE TO THE GROUND FLOOR: Arrival, unloading and transport to behind the first lockable building door on the ground floor, accessible.

### B1: Accessible delivery

Free delivery to the location of use, if transport path is accessible, only for products up to 99 kg. Transport in the building on a normal path to the location of use, excluding set-up, excluding installation.

Same as B1, plus additional charge for heavy products (100 kg or more).

### T1: Free delivery to location of use with transport on stairs.

For products up to 99 kg, excluding set-up, excluding installation.

### T2: Transport on stairs

Possible with a product weight of 100 kg or more. To create your custom offer, we require a description of the transport path: [www.cp.de/twb](http://www.cp.de/twb)

### Installation services

Free delivery to the location of use, including set-up, alignment and installation at the usage site, excluding configuration of the interior fittings. To create your custom offer, we require a description of the transport path: [www.cp.de/twb](http://www.cp.de/twb)

**Notification of delivery** around 1 to 3 days prior to the planned delivery date, free of charge, via e-mail to the responsible contact person.

Scheduled event types without additional charge:

**Approx. delivery week:** Anticipated delivery time frame within one calendar week.

**Fixed delivery week:** Binding delivery during a predefined calendar week.

Scheduled event types with an additional charge:

**From-to dates:** Binding delivery within a time frame of at least 3 days.

**Specific date:** Binding delivery on a specific delivery date with a time window of 8 a.m. to 5 p.m.

## Price

All prices, packaging costs and delivery conditions for orders inside and outside Germany can be found here (always up to date):

# Leading the way in corrosion protection, quality assurance and environmental protection

For almost 100 years, products from C+P have been known for their high quality standard.

Environmental protection is a key issue when it comes to painting at C+P. We rely on German-made paint products. Our paint suppliers are certified according to EMAS, ISO 9001, ISO 14001, ISO 45001 and IATF. We work in a sustainable way and use only VOC-free paints in efficient systems.

We're able to meet our customers' color needs through continual quality testing during the coloration process. We offer high-quality enamel coating with robust, environmentally friendly immersion and powder coating systems for high light resistance. C+P's coatings follow the RAL color register. Thanks to continual system monitoring and color analytics in accordance with the RAL 840-HR color register, this level of quality is ensured for the long term.

State-of-the-art production systems at C+P

Immersion painting at C+P

Powder coating at C+P

## Corrosion protection classes according to the C+P company standard

Corrosion protection classes	Class I Dry zones	Class II Damp zones
	Furniture to be set up in dry rooms with average ventilation*	Furniture for rooms with increased humidity
Version	Coated sheet metal	Sheet metal electrolytically zinc plated and powder coated
Coating	High quality enamel coating	High quality enamel coating
Approved cleaning agents	The original C+P cleaner	The original C+P cleaner
Guarantee	10-year guarantee against rusting through	10-year guarantee against rusting through
Additional charges	No additional charge, as C+P standard	See catalog/www.cp.de/en.

\*When using the lockers in public areas in which the increased use of road salt is to be expected during the winter months, we recommend using the electrolytically zinc-plated sheet metal and shoe trays.

**The classifications apply to all corrosion protection classes only when the surface is undamaged.**

Note: Corrosion-protected locks for wet areas can be found on our accessory pages.

#### C+P the cleaner

Guarantees optimal surface cleaning of your C+P locker.  
**Item no. 99699-00000**

- + Cleans without leaving residue or streaks
- + For automated and manual cleaning
- + Reliably and quickly removes dust, fingerprints and light oil soiling
- + Easy, safe and ready to use
- + Made in Germany

#### Application:

Spray cleaner onto the steel surfaces and then wipe off with a soft cloth or soft paper.

Safety data sheet available at [www.cp.de/en](http://www.cp.de/en).

#### Quality assurance at C+P

In order to maintain and expand our quality standard, continual testing and experimentation are required. At our **in-house laboratory** and in the adjacent testing chamber, we test more than just product details—we test the entire product. The latest scientific testing methods are applied here. One important criterion requiring constant monitoring is the surface and corrosion protection, particularly for our steel lockers.

#### The following testing methods are regularly used at the C+P testing laboratory

- + Load and bay load of components and lockers (up to 4,500 N)
- + Long-term durability of drawers and pull-outs through at least 50,000 opening and closing cycles
- + Door opening overextension test (up to 190° opening angle)
- + Durability of structural connections
- + Continual loading and service life
- + Surface quality
- + Drying behavior in lockers

DIN 50021	Salt spray test with subsequent inspection as per DIN 53167
DIN 50017	Condensation test with subsequent inspection according to DIN 53209
DIN 53151	Cross-cut adhesion test
DIN 67530	Evaluation of gloss
DIN 53153	Buchholz indentation resistance test
DIN 5033	Colorimetry

# Our references

As a market-leading furniture manufacturer of changing room and assembled box locker solutions, C+P isn't just an absolute professional when it comes to interior design—our comprehensive product range offers solutions for the office, archiving, greening and climate control, as well as warehouse and workshop equipment. C+P is a full-service provider accompanying its customers from initial planning to delivery and installation to after-sales service, thereby ensuring a smooth overall process. On the following pages, we present a selection of our references.

# Schneider GmbH & Co. KG

SCHNEIDER is one of the world's leading suppliers of processing solutions to the eyeglass and precision-optics industry. The company is headquartered in Fronhausen (Marburg), Germany with additional branches in the US, Brazil, Hong Kong and Thailand.

The company's success and that of their customers is ensured by high-quality machines, innovative technological concepts and networked production solutions. The fascination with innovation becomes tangible the minute you enter the headquarters.

The company's headquarters, on a floor space of over 9,500 m<sup>2</sup>, are characterized by state-of-the-art climate and heating technology as well as communication and media technology, modern demonstration and training rooms and ergonomically optimized workstations.

People form the heart of a company, and their commitment is the pulse. To foster enthusiasm for innovation, emphasis was placed on a working environment which meets various needs. The result is a unique building that promotes well-being and creates space for new ideas.

The team offices are generously laid out and spacious with a view of the outside grounds, but still allow for privacy thanks to the layout of the double workstations. The furnishings—kept in white with black accents—underline the friendly effect of the space. The intelligent integration of technology allows for the easy reach of connections which can be stored neatly in the cable trough.

Company

Color concept

Many offices, including those of the divisional management, can be used for spontaneous meetings in addition to their function as workstation. Brief meetings can be held at the mobile occasional tables. They're also ideal for quickly extending the work surfaces with flexible sit/stand solutions.

# Bucharest thermal bath

The Bucharest thermal bath is setting standards nationally and internationally. The investor's requirements were correspondingly high for the top-quality changing rooms, which were designed to reflect the uniqueness of the overall complex in their materials and function.

The Prefino series with its highly flexible steel body was used, which allows all cable routing to be cleverly integrated into the slanted roofs of the lockers.

The decision was made for glass doors that require no visible fittings, creating a completely smooth and elegant external front.

Prefino assembled box lockers make optimum use of the interior space available in the changing room system, enabling user capacity to be utilized to the full. The combination with the existing natural marble base creates harmonious interplay among the various components and materials.

The base highlights the fine design of the interior fittings while serving as a practical bench.

The changing cubicles with floating appearance blend in perfectly with the room's stylish design.

Inspired by the Erding thermal bath in Germany, the Bucharest thermal bath is one of Europe's largest thermal springs. A spa complex with a tropical twist was built in an area totaling 25,000 m<sup>2</sup>.

It's a popular destination both nationally and internationally thanks to its central location. The thermal bath has three themed areas to meet the varied needs of its visitors. They can find relaxation in the jacuzzis and aromatherapy pools at The Palm. Six saunas, sunbathing areas and massage areas invite visitors to relax in the Elysium.

# UCLA Wasserman Football Center

## Changing room and assembled box locker solutions for players, coaches and employees.

The newly built Wasserman Football Center of the University of California, Los Angeles (UCLA) gives players and coaches a modern training environment with unrestricted access to the latest football equipment over an area of 7,000 m<sup>2</sup>.

Custom storage space solutions for the players, coaches and employees which harmoniously fit into the design concept of the Wasserman Football Center had to be created for the changing room and assembled box locker areas.

### Requirement: Custom storage area solutions for different user groups

As a market-leading furniture specialist in changing room and assembled box locker solutions, C+P was able to impress the customer with its custom solutions. High-quality lockers and assembled box lockers of the Prefino product series tailored to the individual wishes of the customer were used.

#### A pleasant atmosphere in the changing room

Optimally adjusted to suit the needs of players, the football lockers not only feature technical details but also meet the high design standards of the Wasserman Football Center. Thanks to the harmonious design of the changing room, a space has been created for football players that will positively affect their mood, passion to win and team spirit. In addition to the lockers, the changing area includes a spacious lounge zone that functions as a meeting point for communication and recreation.

#### Football locker with bench and mirrored sides

Both the body and the underframe of the lockers are made of steel, a long-lasting material that conserves resources. Designed in accordance with customer requirements, the steel underframes can absorb high dynamic loads. The frame cladding also serves as a comfortable place for the players to sit. The sides, with a large mirrored area, frame the fold-in doors of the football lockers made of white solid-surface material that elegantly disappear into the body and provide rapid access to the locker interior.

## Personalized lockers for each player on the football team

Matching the consistent color concept of the rooms, the doors are marked with the individual player numbers in blue and gold. The numbers are attached to the door by means of punched holes and can be changed rapidly as required. Each locker also has a plaque personally naming the donors and supporters of UCLA. Four spacious drawers and one changing room rail per compartment offer sufficient space for clothing and shoes.

### Personal security compartments with electronic safety lock

Each player also has access to a high-quality security compartment fitted with an electronic safety lock to store personal items such as smartphones and jewelry. Each security compartment has a power supply and is equipped with a USB port.

### Player equipment distributed via the assembled box locker

The top-quality high-pressure laminate feed-through security compartments, also with milled numbering, contain the players' personal equipment. Clean clothing and helmets can be given to the players from the rear side via central doors. The player enters the PIN code via the electronic lock to open the security compartment.

### User-oriented storage space for coaches and staff

The equipment for the changing areas for coaches and staff, like that of the player lockers, is especially high-quality and perfectly suits the needs of the users. The trainer lockers contain three stainless steel drawers with pull-outs, with the top drawer functioning as a security compartment with PIN code lock, power supply and USB port. The staff locker area is fitted with fine HPL material in black. The doors can be opened via a PIN code lock and have been given milled numbering.

# University of Oregon

## Hatfield-Dowlin Complex, Oregon Football Performance Center.

The newest home of the Oregon Ducks, the football team of the University of Oregon, is a unique and visionary project which has yet to meet its match. The Football Performance Center follows a holistic concept combining architecture and interior fitting in order to perfectly tailor them to the needs of the players. Facades made of glass, granite and metal simultaneously convey both lightness and strength. What seems impenetrable and secretive from the outside is flooded with light and bright on the inside.

### Go Ducks!

“We wanted a locker which had never been seen before. C + P really succeeded in catching the ball and exceeding our expectations.”

(Randy Stegmeier, interior designer, Firm 151)

## The interior fittings are just as multifaceted

The attention to detail reflects the care taken during planning. The designers never lost sight of the actual focus of the project: the well-being of the players. Every aspect of their everyday life, from classes to dining to medical care to recreational activities were carefully considered, and everything was coordinated with everything else down to the smallest detail.

### Luxurious, high-efficiency and ergonomic equipment

The equipment is luxurious, yet still highly efficient and ergonomic. The whole concept is designed to attract the best players and to win the College Football National Championships with the Oregon Ducks team going forward.

# Munich Sparkasse

## The office of the future with C + P SmartLockers

A place of well-being. That's the first thing that comes to mind when entering the "new world of work" at the Sparkasse in Munich. In a pilot space of 750 square meters, the vision for the workplace of the future was implemented in the pavilion of the office tower. Part of this future is C+P SmartLockers. They fit stylishly into the wonderfully created ambiance in the entrance area.

After having supplied new lockers for the fitness changing cubicles at the Munich Sparkasse last year, C+P received an order for 80 C+P SmartLockers for the "new world of work" early this year, according to C+P Key Account Manager André Reis.

48 large compartments and 32 smaller ones were supplied for this visionary project and set up in the pilot space area. The time came in late May of 2022, when the first 55 employees moved into the new rooms. There are also eight trial employment spots for staff from other departments.

Since then, the SmartLockers have proven themselves to be perfect support for the office world of the future in every regard thanks to their flexible options for operation. “The strength of the SmartLocker lies primarily in its decentralized control and flexibility,” stressed Project Manager Moritz Seger. “Control is provided wherever it’s needed.”

The SmartLockers are the first place to go every morning and the last one every evening. Employees don’t just leave their personal belongings there, but their keyboard, headset, mouse and laptop when leaving their workstation as well. This facilitates smooth switching from a home office to in-person work at the office, as well as working in different places within the new office world.

“It’s very practical to be able to open a compartment for a colleague from your desk,” said Martina Seidel, who was impressed with object management. She’s been working permanently in the pilot area since the end of May. She likes keyless security compartments much better. She also finds her new environment to be very comfortable and likes the color and spatial concept very much. “You can work in a much more peaceful environment and with greater focus, while still being closer to colleagues,” reported the employee, who uses one of the large SmartLockers herself. She’s pleased that the large compartments have been outfitted with an additional shelf, which allows her to make even better use of the space there.

The office of the future is here today, including all its opportunities and possibilities. This also includes the option of using the locker compartments in a more flexible way. “Up until now, every employee has had their own compartment,” explained André Reis. “If this is changed over the long term, the number of compartments can be reduced by 10 to 15 percent.”

As Florian Seidl sees things, the options presented by C+P lockers are nowhere near exhausted: “In the short amount of time available, we haven’t explored it in depth at all. There’s still so much potential there.”

Trend products →

# Trend products

---

The products we present to you on the following pages go far beyond our motto, “the steel locker.” They feature optimal solutions for meeting the needs of long-term trends and developments.

A world where keys are no longer important? A box which opens precisely when its moment has come? Dividing rooms without separating them? Designing working environments motivated by the “biophilic design” principle? It’s all possible with C + P.

Discover innovative solutions which have already been tried and tested in practice many times.

# Your doorway to a magically efficient time C + P SmartLockers.

A world where keys aren't important. A compartment which opens precisely when its moment has come. Objects which appear behind a different door than they did yesterday. What seems to be magic—like any stage show—is actually sophisticated technology. Our SmartLockers differ from typical magic tricks in one way, though: Their primary purpose isn't to fool and entertain, but to make workflows at your company smarter and more efficient. This saves you time, space and money, allowing you and your team to concentrate on your own tasks. It also means that cabinets are no longer just a passive storage place, but rather a true asset of your organization. But can't they be fun, too? Open the curtain for the new C + P SmartLockers...

## The advantages to you at a glance:

- + Reduces costs: You don't need to acquire a separate compartment for each employee
- + Productivity: Familiar complications due to lost keys etc. are a thing of the past
- + Saves time: Bothering and distracting transfer situations are no longer an issue
- + Source of income: Compartments can earn you money with pay/rent functions
- + Compatibility: C+P SmartLockers can be connected to a wide variety of different networks
- + Individuality: Flexible configuration for your needs thanks to a modular system
- + Convenience: Lockers can be individually arranged with one another as a locker wall
- + Usability: For social spaces, contactless transfer, employee mail, as a meeting point etc.
- + Independence: The doors can still be opened even in case of a power failure
- + Full service: At C+P, you get everything from a single source: locker, software and support

Compartments can be opened and information on the contents provided using the screen

# Dividing rooms without separating them

## C + P partitions.

## C + P Monotop<sup>®</sup>

### Classy transparency.

Create generous width for the latest office architecture with the transparent and sophisticated design of our unique C + P Monotop partition system. With all the advantages of a relocatable partition system, no less. C + P Monotop impresses with its outstanding design, in particular the elegant connection between two glazing segments. The connection principle of the new segment design requires only the installation space in the 6 mm-wide shadow gap. This means that the visible post width of glazed structures is only 28 mm!

Attractive room-in-room solutions in modern office landscapes are on the rise, whether as a think tank for concentrated working and conferring or as a solo office with consultation spaces. Combination office concepts with individual offices and a central zone “marketplace” demand creative and flexible room solutions.

With C + P Monotop, you can create the ideal basis for the successful implementation of these trendy office structures and remain flexible for the future. There are no limits to the design: Classic hinged doors, or rather the elegant sliding door? Full transparency, frosted glass or even “matte glass at the push of a button” with electrically controlled liquid crystals? From the classic think tank to high-tech room solutions, C + P Monotop opens up every possibility.

C + P Monotop room-in-room solutions aren't just limited to wall systems. From RGB-lit stretch ceilings to the integration of media technology, we've thought of everything with Monotop.

# C + P Light

## Modern glass architecture.

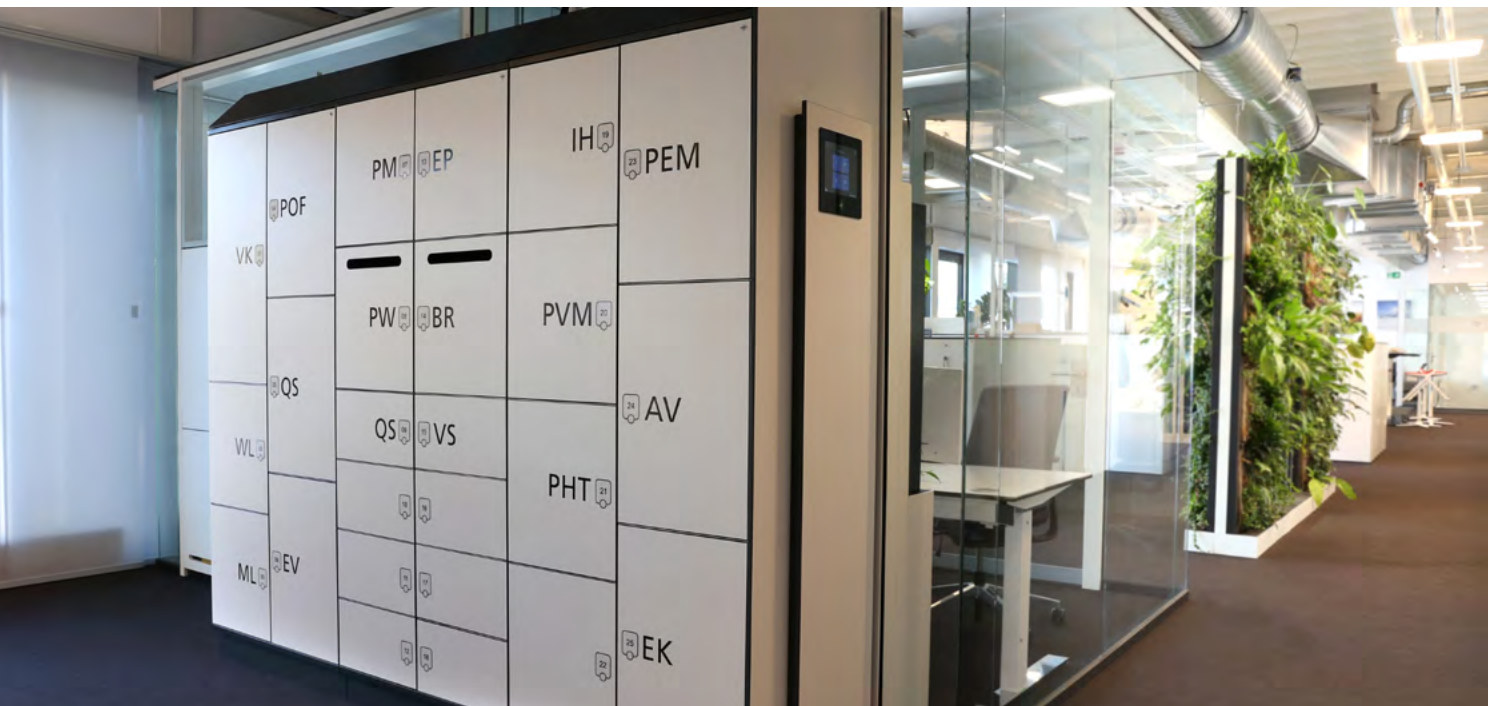

Extension grids, planning, acoustics and style—partition systems involve them all. To make the right choices in all these areas, there's one thing that comes before everything else: experience.

C + P has been manufacturing partitions for more than 40 years. A team of experienced product specialists stand ready to assist you with competent consultation and planning.

Features of modern architecture, as well as many office concepts, include great clarity and openness of the rooms being designed. C + P Light—glass to glass—creates maximum transparency.

# Climate Office – Shaping rooms according to the biophilic design principle

## Climate Office, as an approach based on biophilic design principles

Based on the principles of biophilic design, C+P has developed holistic and sustainable furniture solutions for air purification, greening, climate and acoustics with “Climate Office.” Central themes here include:

- + Room climate optimization
- + Increasing personal well-being

## Increasing well-being and motivation at the workplace

In combination with plants and water, these future-oriented products made of steel—a resource-conserving material—ensure an optimal comfort level on the interior. Biophilic design principles can make a decisive contribution to greater motivation and less sick leave.

### **Advantages:**

- + Healthy air humidity
- + Improved cognitive features
- + Purified air

## Custom C + P green walls Implementation of various different customer projects

Looking for custom wall greening?  
No problem! Feel free to contact us!  
We can also design custom green  
walls tailored to your wishes and  
needs. Gain inspiration from existing  
customer projects.

### ^ GÜNTHER Heißkanaltechnik

The green wall is a true eye-catcher  
in light-flooded administrative buildings.  
A direct view of the yard also enhances  
the experience of nature on the interior.

### ^ ROTH Energie

Arrive and feel at ease—the bright reception counter,  
in combination with custom green walls, is especially  
inviting. Optimally integrated into the green wall, even  
the screen behind the counter is an attention-grabber.

### << Sparkasse Biedenkopf

Nature within a developed environment—the  
plants fit perfectly into this modern spatial  
concept. Shapes, colors and the interior form a  
design unit and lend the room its own character.

To color concept →

# The new C + P color concept

For decades, C+P has made a name for itself with the motto “Show your colors.” It’s said that better is the enemy of good, so our **new color concept** not only features trendy and attractive colors for every environment, but greatly simplifies our **color surcharge system** as well. Most of the time you won’t need it anyway, as we’re now offering 144 colors and color combinations **at no additional charge**.

# C + P color moods and effects

Not everything in life has to be gray! This page includes examples of color moods you can compose with the C+P color pallet however you like. You can use it to create elegant, clean, harmonious or nature-oriented room atmospheres any way you wish.

**Just this handful of examples shows how C+P makes steel as beautiful as it can be.**

# Color concept

## Color group 0

Body and front colors with no surcharge

## Color group 1

Surcharge for bodies/No surcharge for fronts

# Expert paint work

## No surcharge!

With the C+P color concept, 144 color combinations are available at no additional charge.

**For body colors of color group 0, all front colors of the color concept are available with no surcharge.**

## Lots of color, not a lot of money.

**For body colors of color group 1, the additional charge for color is 15%.**

This enables you to make exciting worlds of color a reality without putting too much strain on your budget.

## Special colors? Absolutely!

Paint finishes in all RAL colors outside the C+P concept are also possible.

**The color surcharge for this is 25% (minimum order: 5 lockers).**

Subject to technical testing and availability.

Feel free to send us your requests.

### Important notes:

These color charts are intended solely as a guide to the approximate impression of the colors. For more exact color representations, please consult the RAL color chart or the original samples. Colors are subject to deviation and do not constitute grounds for complaint. We cannot accept any liability for printing and representation errors or flaws. All depicted decors, colors and surfaces are available as standard. Other versions (e.g., for contract furnishing) are available on request. The color surcharge system on page 48/49 applies only to furniture where the body and fronts are each coated in a **single** color. For other variants (e.g., different front colors on the same cabinet), please let us know your specific project details. **Please note that various product groups have their own selection of colors and** are not coated according to the C+P color concept. You can recognize the respective products by the individual color information provided on the respective pages of the catalog. Underframes are supplied in black gray as standard. We always coat shelves, hanging frames etc. in light gray, unless otherwise specified in the product series. Zinc-plated shelves are uncoated. For the color **RAL 9006 White Aluminum**, the RAL Institute has no uniform template and definition so that, despite having the same name, there may be color differences when compared to other materials, previous production batches, different coating procedures or third-party products.

## C + P decor fronts

- + HPL (high-pressure laminate) is available with a classic wood look or in single colors.
- + HPL is scratch-proof, non-porous and impresses with its high stability.
- + The door is 100% moisture-resistant and features outstanding hygiene properties!
- + MDF (medium-density fiberboard) decors are also available.

Evolò PLUS  
Body: RAL 7016 anthracite gray  
Doors: Sereno oak

Evolò PLUS  
Body: RAL 7016 anthracite gray  
Doors: Natural silver spruce

## Decor fronts (MDF)

With 18 mm black edging

## Solid-core decor fronts (HPL)

With 13 mm black solid-core edge

### Important note:

All of the specified decors within a top type are available with no surcharge!

The birch gray VK 741 decor is similar to light gray.

The core of the HPL top is always black.

# C + P office furniture decors

Add a special touch with wood decors. Whether it's classic maple, acacia or light gray or a more modern appearance with a concrete look or in diamond white, add some color to your office! Choose between DBS decors (melamine coated particle board) for the respective occasional cabinet and table ranges and HPL decors (high-pressure laminate) for optional solid-core top covers of the Asisto steel cabinets.

## Important note:

All of the specified decors within a top type are available with no surcharge!

The birch gray VK 741 decor is similar to light gray.

## Decors (DBS)

With 25 mm edge band

## Syncro decor tops (DBS)

With 25 mm edge band, only for tabletops of the Asisto sit/stand tables

### Syncro decor

Is it real wood or a decor?

Syncro decors with light/dark oak impress with their incredible look and feel. The surface texture matches the grain, giving the impression of real oak. It not only looks real, but feels real, too!

## Solid-core top covers (HPL)

With 13 mm black solid-core edge

# Versatility, security and utility

## The new Classic PLUS.

This model shows that the classics don't just ride the retro wave, but can reinvent themselves, too. It's predecessor, the C + P Classic, is known by many as a secure storage location for personal and valuable items at companies, schools and museums, for example, and this hasn't changed. What is different is the fresh design and variety of combination options and details—some of which are immediately apparent, and others only later on. We think its true utility is also expressed by the fact that it's subjected to the test bench and dynamically adapted to new conditions again and again.

Classic ventilation gills with stamped-in label holder

Anti-rotation and high-load-capacity double sliding hooks with special mounting, e.g. for hangers or retrofitted partitions

Safety turning bolt latch for padlock (turns while locked, thereby preventing break-in through over-turning), incl. door protection

## Rock-solid arguments

- + Sturdy steel construction with high-quality enamel coating
- + Bottom and locker floor generally zinc-plated for increased corrosion protection
- + Break-in-resistant design as per class B according to DIN 4547
- + 2 compartment widths, 5 different box heights
- + Reinforced doors, hinged on the right, with doorstop silencer, ventilation gills and label holder, as well as safety turning bolt latch for padlock (assembled box lockers with smooth doors and cylinder lock)
- + Single-tier lockers: Inside each compartment: 1 non-adjustable storage shelf with sturdy changing room rail below with 3 anti-rotation double sliding hooks (load capacity per rail: 40 kg, per double hook: 15 kg)
- + Double-tier lockers: Inside each box: 1 sturdy changing room rail with 3 anti-rotation double sliding hooks
- + Compartment bottom can be swept out easily
- + Slim lateral edges for a homogeneous look when lined up next to one another without doubling at the locker joints
- + Additional ventilation thanks to ventilation openings in compartment bottom and top as self-ventilation concept through structurally optimized air flow behavior

### Available floor-standing, with feet, base or bench

- + Plastic feet, base featuring increased corrosion protection, both for body RAL 7035 in light gray, otherwise in black gray
- + Optional level adjustment for floor-standing, feet or base
- + 420 mm-high bench frame made of square tubing in black gray, with 10 mm level adjustment, bench slats made of 60 x 25 mm beech, rounded on all sides, coated with clear varnish with natural color variations
- + 450 mm seat height, 315 mm seat depth
- + Bench and locker separate for easy DIY assembly

## Assembled box lockers.

Doors are single-walled, smooth, without ventilation gills and without label holders (if required, please order additional plastic label holders).

400 mm compartment width also suitable for motorcycle helmets. Each door features cylinder lock and 2 keys. The bottoms of the boxes are generally finished in the body color. For publicly accessible boxes, we recommend door opening limiters.

## Z lockers.

Z lockers only require the space of a double-tier locker, but offer hanging room for long items of clothing. No risk of collisions at the doors thanks to appropriate positioning of the lock.

Per compartment: 1 door, top and bottom storage shelves, sturdy changing room rail with an oval profile and 3 anti-rotation sliding hooks.

Doors above and below feature ventilation gills, punched-in label holder and turning bolt latch for padlock.

Clear opening width of the narrow area  
(comp. wid.: 300/400 mm):

Left door: 123/173 mm

Right door: 109/159 mm

# Sophistication, high value and presence

## The new Evolo PLUS.

This version—elevated to the next level both technically and visually—is the re-molded flagship of all our models. In environments where maximum precision and cleanliness are indispensable, it's totally in its element—laboratories, clinics, research institutes and high-tech forges, to name a few examples. Its entire appearance is smooth, hygienic and easy to clean—both outside and inside, too. It shows its astonishing technical feats effortlessly and with refined understatement. It's optimally networked and grows to meet its tasks—it loves new challenges.

Evolo PLUS designer hole pattern ventilation with Comfort label holders

Anti-rotation and high-load-capacity double sliding hooks with special mounting, e.g. for coat hangers or retrofitted partitions

The SAFE-O-TRONIC LS 400 lock is shown here. This series enables a total of 58 different locking variants.

## Unbeatable plus points

- + Sturdy steel construction with high-quality enamel coating
- + Especially break-in-resistant design as per class C according to DIN 4547
- + 2 compartment widths, 6 different box heights
- + Special cover profile on the side in the body for easy removal of clothing, extremely easy interior cleaning and for covered cable ducts, e.g. for locking systems
- + Reinforced doors, hinged on the right, with doorstop silencer, designer ventilation hole pattern and matching Comfort label holder, as well as safety turning bolt latch for padlock (assembled box lockers with smooth doors and cylinder lock)
- + 90° door opening limiter as standard
- + Optionally available with decor doors in MDF or HPL
- + Single-tier lockers: Inside each compartment: 1 non-adjustable storage shelf, sturdy changing room rail with 3 anti-rotation double sliding hooks below
- + Double-tier lockers: Inside each box: 1 sturdy changing room rail with 3 anti-rotation double sliding hooks
- + Compartment bottoms can be swept out easily
- + Wide variety of interior fitting solutions for any requirement
- + Slim lateral edges for a homogeneous look when lined up next to one another without doubling at the locker joints
- + Additional ventilation thanks to ventilation openings in compartment bottom and top as self-ventilation concept through structurally optimized air flow behavior

### Available floor-standing, with feet, base or bench and in other versions, e.g. with built-in storage box

- + Plastic feet, base featuring increased corrosion protection, both for body RAL 7035 in light gray, otherwise in black gray
- + Standard level adjustment for floor-standing, feet or base
- + 420 mm-high bench frame made of square tubing in black gray, with 10 mm level adjustment, bench slats made of 60 x 25 mm beech, rounded on all sides, coated with clear varnish with natural color variations
- + 450 mm seat height, 315 mm seat depth
- + Bench and locker separate for easy assembly

# Evolo PLUS

## Z lockers.

Z lockers only require the space of a double-tier locker, but offer hanging room for long items of clothing. Evolo PLUS models **do not have a bothersome door overhang** like conventional Z lockers. This prevents injury and enables a convenient, central lock position.

Per compartment: 2 doors closing in the middle, top and bottom storage shelves, sturdy changing room rail with an oval profile and 3 anti-rotation sliding hooks.

Doors feature label holder and turning bolt latch for padlock.

Clear opening dimensions per door  
(Comp. wid. 300/400 mm):

Height of large door: 1,293 mm

Width of left doors: 123/173 mm

Width of right doors: 109/159 mm

# More versatile than other lockers

## Cambio lockers.

Cambio from C+P is more than just a locker!  
 These hard facts make this range so very  
 incomparable:

- + **Innovative ventilation**  
 and drying thanks to the SVL, FVL and FVLD concepts  
 (see p. 170)
- + **Optimum use of space and interior design**  
 thanks to corner, niche and end solutions
- + **Underbench solutions designed to meet your needs**  
 for adaptation to any room situation
- + **Choose from many materials and colors**  
 for every taste and every need
- + **Body, base and steel doors electrolytically  
 zinc-plated as standard**

Cambio →

Cambio from C+P features lots of space for customer-specific solutions, of which a few examples are shown on the following pages. The range of options is endless: single- and double-walled steel doors, HPL decor doors, corner lockers, electronic locking systems and so much more...

Let us know what you're looking for and send us your project-specific request! In the world of changing room and assembled box lockers, Cambio is the professional answer to just about every furnishing requirement.

# Optimal Cambio lockers.

→ The Cambio ventilation concepts

Detailed explanation → p. 170

Sophisticated and pleasant for meeting the highest standards.

130 mm-high feet, vertically adjustable from inside and outside with sleeves.

**Single- or double-walled doors with insulation:**  
Single-walled steel doors with closed side profiles for maximum stability. Double-walled sandwich construction doors with convenient body sound absorption for minimal unpleasant noise.

90° door opening limiter as standard design. New design with high-load, plastic-sheathed stainless steel special cable.

**Stainless steel hinge:**  
For HPL decor doors.

**Can be integrated into Cambio:** All common mechanical and electronic locking systems, from turning bolt latches to coin-operated locks to electronic locking systems as part of complete building automation (see p. 214).

**Cylinder lock:**  
With 2 keys as standard equipment.

# C + P POWER LOCKERS

## Smart ventilation and drying with C + P power lockers.

Self-ventilation using the SVL concept was examined and confirmed with Cambio and Prefino from C + P.

Thanks to the flow behavior resulting from the design, damp clothing dries out considerably faster—guaranteed, and without any additional energy input! For special drying tasks, forced ventilation concepts with and without dryers are also available. We look forward to your handling your task.

### SVL

Self-ventilation

Our SVL technology means effective drying, without any additional ventilation equipment at all!

- + Can be used for 90% of all drying tasks
- + No customer-side requirements
- + Perforations positioned with ventilation in mind ensure optimal flow and efficient drying in the locker
- + Standard with Cambio and Prefino lockers

### FVL

Forced ventilation

Our FVL technology means a high air renewal rate thanks to connection to the customer's ventilation system.

- + Improved drying and odor elimination
- + Used in industrial plants and in foodstuff processing, for example
- + Extraction occurs by way of the customer's ventilation system (ideally with heat exchangers to reduce energy loss)
- + For optimal ventilation, we recommend an air renewal rate of 8 to 10 times per hour

## PERFORMANCE COMPARISON

All specifications and values assume a room temperature of approx. 20°C at a relative humidity of approx. 50% (common climate in Central Europe).

### FVLD

Forced ventilation with dryer

Our FVLD technology means maximum drying efficiency with minimal energy consumption.

- + Closed drying system for up to 15 compartments with integrated condensation dryer
- + Used at building yards, at road maintenance depots and in the construction industry, for example
- + Only a drain for condensation water and a power connection are required
- + Very energy efficient: The power consumption of the dryer is only 550 watts!
- + Up to 30 liters of water can be dried per day!
- + In addition to moisture, odors are also eliminated to a large degree
- + A separate, energy-hungry drying room is unnecessary.

### FLEX+

Drying and preheating

Our FLEX+ technology means high efficiency and optimum flexibility—the perfect solitary locker solution.

- + The right choice for places where employees get wet while working and need to dry out both their clothing and lots of protective gear for its next use, preheat it if desired and keep it securely locked up
- + A power connection's all that's needed
- + Drying, ventilation and heating can be controlled and programmed with an app in an energy-efficient way
- + Special interior for drying and preheating helmets, gloves and boots

# Cambio

## Lockers.

### Features of the Cambio series:

- + Sturdy steel construction with overlay doors and high-quality enamel coating
- + **Interior slopes in the body for high stability and easy, convenient clothing removal**
- + **Novel ventilation using the SVL concept as standard**
- + Steel fronts (single-walled, optionally double-walled and insulated) or optional HPL with wood decor for an even more attractive appearance
- + Door hinges for sheet metal doors made of aluminum/plastic
- + Door hinges for phenolic HPL decor fronts made of stainless steel
- + 90° door opening limiter for outstanding closing characteristics as standard
- + **Body, base and steel doors electrolytically zinc-plated as standard**
- + Cylinder lock with 2 keys
- + **Optimum air circulation thanks to defined ventilation spaces in front of and behind the bottom storage shelf**
- + Sturdy changing room rail with an oval profile, 4 anti-rotation hooks with system holder, e.g. for coat hangers or movable partitions
- + Wide variety of interior fitting solutions for any requirement
- + **Slot-in shoe shelf, easy to retrofit by the user**
- + Height adjustment using adjustable 130 mm-high plastic feet, easy to operate from inside and outside
- + Vertically adjustable base
- + Wear-resistant plastic feet ensure protection from corrosion
- + Sub-frame available with feet or base, as well as with spacious storage box or bench on request

- (A) Locker rows and individual lockers → p. 172
- (B) Corner lockers → p. 182
- (→) SVL concept® and drying guarantee as standard → p. 170

#### Door version:

- + Single-walled, reinforced steel doors as standard
- + Optional: Double-walled, insulated steel doors
- + Optional: HPL decor doors (standard with Z lockers)
- + Steel doors are 19 mm thick, HPL doors are 13 mm thick

## Z lockers.

### Z lockers offer more:

- + Optimum use of the interior space for 2 users, with low floor-space requirements
- + For use in areas that only offer enough space for a double-tier locker but still require long items of clothing to be hung
- + **Lots of storage space!** Lots of storage space! Large, bulky bags or helmets, long garments, shoes and small objects all have their place
- + Great overview thanks to **functional division** in the locker
- + Each compartment has a rail with 3 hooks on the side
- + **HPL decor doors as standard**

Order no. 45180-224

## Changing room corner lockers.

### Cambio creates spaces

It makes a big difference whether furniture is simply placed in a room or whether the furnishings become part of the overall interior architecture. Cambio meets all the requirements for harmoniously integrating into any desired environment.

Thanks to intelligent corner lockers which are flexible in use as an inside or outside corner, incomparable spatial experiences are created.

More than just a large number of available locker configurations are decisive for integration potential—the diversity of material options and the surface design also play a key role.

Please send us your project-specific request.

# Prefino

## For the most stringent requirements.

**There are tasks that only specialists can handle. Furnishing changing rooms, for example.**

Where a crucial bit of extra space, functionality and design is needed—that's where Prefino comes into play.

- + Looking for attractive, uniform **glass fronts** with door mounts not visible from the outside?
  - + Looking for a **double-walled design** allowing you to route cables in a clean way or implement interior lighting, for example?
  - + Outfitting **areas with high hygienic requirements** and value smooth internal walls and locker floors, as well as face plates for **optimal cleaning and disinfection**?
  - + Looking for a **reconfigurable** modular system for complete flexibility and investment security as well?
  - + Seeking a broad a range of **locker variants** and available **door types and materials**?
  - + Want to make **special requests** a reality, like room lighting integrated into the locker top or custom-printed locker fronts?
- If so, Prefino from C + P is the right product range for you!

Prefino offers countless customization options. We look forward to your project-specific inquiry and will gladly provide you with an offer tailored to your specific needs.

# Prefino

## Have a seat!

Depending on a building's design, a variety of different sub-frames can be utilized with locker systems. Prefino is flexible, making it well equipped for any challenge.

In addition to the classic foot and base designs, integrated bench solutions are becoming more and more commonplace. Whether it's overhanging benches on an existing base, benches built in front with locker doors reduced in size or benches with storage boxes underneath: Prefino is the best choice for ideal results.

All of the sub-frames shown here are very easy to clean, in part thanks to clear-cut corner solutions. This means extraordinary sanitary conditions and simple, fast and cost-effective cleaning as a result. The variant with storage boxes underneath also offers additional storage space that has generally gone unused—a true added benefit for visitors.

**We look forward to your project-specific inquiry.**

### **Bench with storage box underneath:**

The seat serves as a lid that can only be opened by the user of the locker. It ensures that bags, helmets and other items can be stored conveniently and removed easily.

## A clean solution.

In areas with high hygiene requirements (e.g. in the foodstuffs industry) locker systems require something special. As well, connecting to existing ventilation and extraction systems also requires a professional solution.

# Flex PLUS drying locker

## Drying and heat with maximum flexibility.

**The right choice for places where employees get wet while working and need to dry out both their clothing and lots of protective gear for its next use, preheat it if desired and keep it securely locked up.**

Ambient air is drawn in and fed into the locker interior through the ventilation/heating element integrated in the slanted roof. Here, it exits through various air outlets like pipes/holders for boots, helmets etc. The extracted humidity escapes into the surrounding room, which has a positive effect on the room climate in the winter when heating air is dry. Dripping water is led downward out of the compartment via the perforated stainless steel tray.

The hours of operation can be conveniently controlled with an app. Independent program circuits for ventilation and heating ensure energy-saving and efficient use. With optionally available 230-volt sockets, additional electrification for charging e-bike and other mobile batteries is possible, for example.

Number per locker		2 compartments for 2 people	2 compartments for 1 person
Helmet holder		2x	1x
Upper storage shelf		–	1x
Hinged floor		2x	1x
Glove holder		4x	4x
Side hook rail		2x	1x
Perforated stainless steel tub		2x	2x
Sockets in compartment		Optionally available	
Drying coat hanger		–	2x
Metal mirror, large		2x	1x
Small-part repository		2x	1x
Lock with 2 keys		2x	1x
Boot holder		4x	4x

## Product information

- + Flex PLUS technology enables the fastest possible drying of work clothing. Wet clothing is usually dried especially energy efficiently within 1 to 3 hours!
- + The electrical consumption of the ventilation/heating element integrated in the slanted roof is less than 0.15 W in standby, 8.8 W in ventilation mode and 1,000 W in heating mode
- + Sturdy steel construction with multi-functional modular system, overlay doors and high-quality enamel coating
- + Body height: 2,100 mm (2,200 mm incl. feet, 2,350 mm including slanted roof)
- + Body and steel doors electrolytically zinc-plated as a standard
- + Fronts made of steel or HPL with wood decor for an even more attractive appearance
- + Double-walled design for high stability
- + Smooth interior walls—hygienic and easy to clean
- + Perforated storage shelf for improved ventilation
- + Convenient operation of the control unit with an app (Apple or Android), each locker individually operable
- + Connection cable with grounded plug, approx. 5 m long.

# Electronic locking systems

Locking systems →

C+P has outfitted many lockers with electronic GANTNER locking systems. Just ask us—we'd be happy to advise you!

**Modern locker locking systems from GANTNER**

The requirements on modern lockers and security compartments are very clear: They have to be easy to manage, straightforward in operation and, above all, secure. Each and every GANTNER solution boasts these features.

The identification—and therefore operation—of GANTNER locks occurs in an intuitive and convenient way using a contactless data carrier (chip) integrated into a card, a wristband, a key ring or a watch. Alternatively, the lockers can be operated with a smartphone app.

Locker locking systems from GANTNER can be perfectly integrated into holistic solutions. Using the same contactless data carrier, a unique customer experience is created throughout the entire system— from the ticketing

web shop to the access solution at the entrance through to the cashless payment solution.

The product portfolio includes centrally powered systems with a power pack operated and managed using locker management software. Alternatively, battery-powered locker locks enabling especially easy retrofitting are available. What they all have in common is easy operation and flexible use for all types of cabinets, lockers, rental & security compartments and for frequently changing users and personally assigned lockers.

**GAT NET.Lock**

- + Operation with a chip card, key ring or wristband
- + Management and control using the eLoxx Suite software (on premise, cloud or embedded)
- + Automatic opening of all lockers
- + Alarm in case of break-in attempts
- + Statistical evaluations easy to create
- + Status overview of all lockers on a computer, incl. utilization overview
- + Authorization can be defined for one or more people for each locker
- + Intuitive operation—unique LED status indication
- + Automatic self-calibration and large reader range
- + No maintenance costs
- + Emergency mode in case of loss of service
- + High quality and long service life

Wired GAT NET.Lock locker lock

**GAT ECO.Lock**

- + Locker operated with chip card, key ring or wristband
- + No wiring required
- + Easy retrofitting of existing lockers
- + Intuitive operation
- + Can be integrated into access systems
- + Authorization can be defined for one or more people for each locker
- + Free locker selection or personalized locker assignment
- + High quality and long service life (including the batteries)
- + Clear and unambiguous status indication on the locker
- + Battery-operated and wired locks can be combined
- + Minimal maintenance costs

Battery-operated GAT ECO.Lock locker lock

**GAT ECO.Side Lock**

- + Low-power technology from GANTNER ensures around 10 years of use before a battery change is necessary
- + Audible and visual alarm functions on the locker
- + Locker aesthetic isn't disrupted thanks to fully internal installation
- + Protected against vandalism (no external parts)
- + Intuitive one-handed operation
- + Easy installation, no wiring—suitable for all locker materials
- + Large variety of operating modes—free locker selection, personal locker or time-limited locker
- + Multiple master keys

Battery-operated GAT ECO. locker lock Side lock

**GT7 terminal**

- + Universal terminal with different apps for different applications
- + Rugged hardware with touch display and integrated RFID reader
- + Flush-mounted and surface-mounted variants available
- + Different interfaces for flexible integration into an overall system
- + Info app: Read the locker number from the data carrier
- + Access app: Available for access control
- + G7 Connect service: Cloud-based commissioning and backup (for even greater security)

GT7 terminal with info app

# Locking systems:

## Examples of many different options.

### Electronic PIN code lock 3780

Whether for free locker selection or for permanently assigned security compartments and lockers, the 3780 is the perfect solution whenever the use of keys for locker locking is not desired.

Instead of a key, a 4-digit numerical code ensures secure locking and unlocking of the locker or security compartment. In a nutshell, the Euro-Locks PIN code lock stands out thanks to its:

- + Ease of use
- + Fast installation
- + Compatibility with the most common standard hole patterns for cylinder locks
- + Ease of operation and code setting
- + Immediate readiness for operation
- + Emergency opening using master key function in case of battery failure

Should battery replacement be forgotten and the battery die (but the locker compartment needs to be opened), the lock can be opened mechanically with the integrated lock cylinder with a master key, preventing the need for destructive opening.

Available in the colors silver and black

### All the advantages at a glance

- + Private, public and technical mode
- + Operated with 2 type AA batteries
- + 4-digit user code
- + 6-digit master code, 6-digit technical code
- + Up to 80,000 tested locking cycles with one set of batteries
- + Battery status warning via LED
- + Master key (optional)
- + Audible signal (switchable)
- + Function display via LED
- + Sturdy die-cast zinc housing and handle

**Note:**

If you are buying locks at a later stage, we always need you to provide the original order and the locker type.

C+P has outfitted many lockers with electronic locking systems. Just ask us—we'd be happy to advise you!

## Mechanical combination lock WF 1401

The mechanical WF combination locks are characterized by easy operation and a rugged and functional design—they're the affordable alternative to electronic PIN locks.

- + Maintenance-free, as they're purely mechanical; 10,000 freely programmable user codes
- + Lock cylinders for service key (for resetting and emergency opening)
- + For the WF 1401 for permanent users, the code is automatically obscured after each use but remains stored
- + For the WF 2112 for changing users, the code is reset before each use and manually obscured by the user

## Mechanical coin-operated deposit lock 1606

The first coin-operated deposit lock which can be used as a real lever lock with nearly all steel lockers or retrofitted. Its compact size offers considerable space and cost advantages over conventional coin-operated deposit locks when used on smaller compartments.

- + Maintenance-free, as it's purely mechanical
- + Master key-compatible
- + Convenient front operation, self-explanatory design, no instructions required
- + Practical reversible key with pleasant large grip area
- + Lock cylinder with centering as insertion aid, also easy to operate by persons with disabilities
- + Rugged design and compact, round shape means essentially no attackable surface for the use of force or vandalism
- + Theft-proof storage of the coin while locked thanks to two powerful metal claws
- + Available for 1 Euro coins as standard, various other currencies available on request

## Electronic PIN code lock 1904

PIN code lock 1904 is a battery-operated, self-contained and standalone lever lock.

The electronics offer numerous settable functions and operating modes. Operation and programming are supported by visual and audible signals.

- + Flexibly settable for permanent or changing users, freely selectable master and user codes, in-use indication and battery warning
- + AUTO-OPEN TIMER (automatic door opening at a settable point in time) in public mode
- + Lock cylinder for service key for emergency opening and more:
- + Operating section, incl. battery, removable without tools using service key without opening the locker door—for convenient programming and battery changing at any location (practical with low compartments, for example)
- + Battery change possible without losing any codes or settings
- + Depending on the operating mode, up to 100,000 locking cycles with a single commonly available 1.5 V AA alkaline battery

## Electronic RFID lock 1905

The RFID lock 1905 is a battery-operated and self-contained system which works only with WF-certified and -initialized transponders (13.56 MHz Mifare Ultralight). This makes it the first choice for use wherever locks and transponders are to harmonize with one another perfectly and flawlessly.

Cards, key rings or wristbands can be used as the transponder.

- + Dimensions, battery access, bolt, service key and mechanical design are identical to PIN code lock 1904
- + Large number of settable functions and operating modes for permanent and changing users (private/public)
- + AUTO-OPEN TIMER (automatic door opening at a settable point in time) in public mode
- + Read/write system where information can also be transferred from the lock to the transponder
- + Easy programming using accompanying transponder with NFC-compatible smartphone and free app

- + In-use indication in public mode: Only a single transponder can be programmed per lock
- + In private mode, up to 8 transponders can be taught in and withdrawn again per lock
- + Information such as locker and compartment numbers can be read out by authorized persons if necessary
- + Depending on the operating mode, up to 80,000 locking cycles with a single commonly available 1.5 V AA alkaline battery

All locks are innovative German-made products suitable for indoor use only.

## Combined RFID and PIN code lock SAFE-O-TRONIC® access LS

SAFE-O-TRONIC® access replaces the conventional cylinder lever locks with electronic locking convenience. This finally makes cumbersome key management a thing of the past. PIN code and RFID technologies are combined in a unique way.

### Keyless with a PIN code

The personal PIN code can be conveniently entered through a light touch of the key pad. Programming the locking system with master codes is also possible using an RFID card to save time.

### Contactless with an RFID card

For use with RFID data carriers (e.g. card, wristband or key ring)—just hold the data carrier in front of the reader. All RFID technologies as per ISO 14443 A (e.g. MIFARE®) are available.

SAFE-O-TRONIC®  
access LS 101  
PIN code lock

SAFE-O-TRONIC®  
access LS 200  
PIN code lock  
with RFID programming  
and RFID master  
function

SAFE-O-TRONIC®  
access LS 300  
RFID lock

SAFE-O-TRONIC®  
access LS 400  
combined RFID  
and PIN code lock

## All the advantages at a glance:

- + **Easily adapt standards**  
Locker doors prepared for the usual standard lever cylinder can very easily be outfitted or retrofitted with SAFE-O-TRONIC® access. This saves both time and money at the time of installation.
- + **Flexible management**  
Different user groups can be organized extremely easily with a PIN code (e.g. daily visitors) or RFID chip card (e.g. club members, and personnel).
- + **Convenient operation**  
A light touch of the keypad (capacitive technology) is all that's required to enter a personal PIN code. RFID data carriers are simply held in front of the reader for identification. The keyboard won't wear down and facilitates use in wet rooms like swimming pools and sauna areas.
- + **Locker capacity optimization**  
Large variety of functions for protection against compartment reservation optimize your locker capacity. Among other things, this allows you to program your lockers in a way that locks or unlocks them automatically at a predetermined point in time (e.g. automatic nighttime opening).
- + **Controlled opening**  
Should it be necessary for the personnel to open a locker, master locking which only allows opening—and not uncontrolled re-closing—is available in addition to conventional master locking. This way, you increase security for your visitors and protect your personnel from false suspicion.
- + **Organize offline locking systems online**  
The card-based network SAFE-O-TRONIC® CyberNet offers online convenience for offline locking systems.
- + **Time-saving programming**  
Your locking system can be programmed in a flash thanks to SystemKeys.
- + **Convenient monitoring options**  
For monitoring purposes, all locking processes can be logged, printed, analyzed and verified beyond a doubt.
- + **Universal applications**  
The slim SAFE-O-TRONIC® access LS designer lock is suitable for locker doors on the left and right as well as doors in special shapes.
- + **Custom design**  
From locker numbering to logos, SAFE-O-TRONIC® access makes your custom design ideas a reality.

Please send us your project-specific request.

## Coin-operated locks

C + P offers locking systems of the SAFE-O-MAT brand for its assembled box and changing room lockers. Lockers with these locking systems are suitable for use at public facilities and institutions such as swimming pools, sports facilities, schools, universities, fitness and recreation centers as well as at shopping malls, trade shows, libraries and hospitals. SAFE-O-MAT systems are available in different variants:

The **2-coin slot models** are available as both a deposit lock and as a combined deposit/token-operated lock.

- + The **twin-coin deposit lock** enables the user to choose between two different coins for use in the coin slot. This prevents operators and users alike from having to change coins.
- + With the **twin-coin multi-use combined deposit/token-operated lock**, a visitor can insert a deposit coin which is returned to them after using the locker, in addition to a coin paid as a fee. This enables the visitor to come back and use "their" compartment as often as they'd like, free of charge. The inserted deposit coin also protects against key theft.
- + The **deposit/token-operated lock** is also optionally available for other coin combinations.

### Functioning of the locking systems

Prior to use, the key is firmly lodged in the lock and the locker door is open.

After the required coin(s) or token is/are inserted, the door can be closed and the key removed. Clothing and valuables are securely stored. The user holds on to the key.

As soon as the user re-opens the locker, the coin/token drops into the collecting tray. The key is again firmly lodged in the lock, making the locker available for the next visitor right away.

### Practical key logistics

Key wristband sets and identical numbering on the locker and wristband (available upgrades) ensure practical use. Thanks to keys with clip-in number plates, the locking system can be organized very easily and conveniently. The number plates can be clipped into the key head by the operator themselves at any time—in seconds and without any tools. This eliminates the need for elaborate stamping and fastening. At the same time, it ensures greater flexibility and saves time when numbering and allocating the user keys. The fully laser-marked number plates can be stored on site in sets of 50.

Twin-coin deposit lock

### Additional security

The SAFE-O-MAT locking system has an exchangeable cylinder system as standard. By means of an emergency opening key, it allows for emergency openings (if keys are lost) through controllable cylinder replacement. Visitors who have lost their key can receive help immediately. The lost key doesn't pose a threat to security, as the replaced lock cylinder ensures that the key no longer fits the lock.

Special benefit of this solution: Quick cylinder replacement after any key loss means there's no need to buy several spare keys for every lock. This also eliminates any associated security risk. One or two replacement cylinders are all you need! In addition, there are no risks associated with the traditional master key system where the loss of the master key can jeopardize the security of the entire locking system.

However, a conventional master key can be provided on request in order to, for instance, take the deposit coin as a "fine" for the unauthorized reservation of a compartment. Let us help you with your individual needs.

## The advantages of coin-operated locks at a glance:

- + **Lower operating costs**  
No need for staff members to give out and take back keys.
- + **Protection against key loss**  
The locker key is held in the lock until the locker is in use. Even after the locker is opened, the key is automatically lodged in position and cannot be removed accidentally.
- + **Time savings for the user**  
No long wait for keys to be issued.
- + **Better utilization of locker capacity**  
The locker can be used by different visitors several times a day.

Twin-coin multi-use token-operated lock

## Key head and wristband versions

As standard, SAFE-O-MAT locks are supplied with a **standard key head**. Wristband set 1, which is also standard, also fits this, where the wristband is inserted crosswise through the key:

On request, the **ball holder key head** and matching wristband set 1 can also be provided. This features a key protection pouch in which the key can be held parallel to the wristband.

The **ball ring key head** is also available on request. This is not suitable for wristbands, but only for number tags with a key ring.

**Prior to ordering, please choose** the variant you need, as different versions **cannot be retrofitted!**

# Benches and benches with coat rack

Sturdy and flexible in use.

## Stackable benches, series 855

### The stackable benches

- + Sturdy round tube steel frame construction with high-quality enamel coating
- + Seat section made of solid beech wood slats coated with clear varnish
- + Benches can be stacked
- + Plastic floor gliders
- + Delivered fully assembled

## BASIC benches and benches with coat rack

### The tried and tested benches with wood and plastic slats

- + Sturdy steel square tube construction with high-quality enamel coating
- + Seats, backrests and hook rails made of rounded hardwood slats, with clear varnish
- + Alternative plastic bench slats with steel core
- + Adjustable floor gliders for easy level adjustment (10 mm)
- + Hook rails with plastic double clothes hooks, concealed according to DIN 7917
- + Delivered preassembled for immediate use
- + Optional shoe rack, can also be retrofitted

# Industry-specific and custom solutions

## Fire service lockers

### The professionals for professionals

- + Complete range for all fire service applications—developed in practice, for use in practice
- + Sturdy steel construction with high-quality enamel coating
- + All locker bottoms are zinc-plated for optimum corrosion protection as standard
- + Optional folding C + P helmet holder with effective ventilation function, suitable for all common EU helmet manufacturers and sizes without adjustment.
- + Various compartment widths and versions available
- + All lockers can be combined with one another
- + Large selection of practice-oriented accessories
- + Available floor-standing, wall-mounted, with feet or with base

## Laundry collection and dispensing lockers

### The well thought-out dispensing and collecting lockers

- + Sturdy steel construction with high-quality enamel coating
- + Dispensing lockers with two different box sizes
- + Practical central door for collective loading and individual unloading
- + Either feet or base as sub-frame
- + Collection lockers with integrated swing flap
- + Laundry-bag holder

## Laptop lockers

### The secure computer garage

- + Sturdy steel construction with high-quality enamel coating
- + The solution for secure and space-saving storage of 10 or 20 laptops, notebooks or tablets
- + Optionally available with power connection in each box (sockets always installed on left, locker connection cable included)
- + Doors hinged on the right, with sturdy swivel rod hinge
- + One cylinder lock with 2 keys for each door

## Loading assembled box lockers

**The spacious loading aid with 2 sockets per box**

- + With boxes for the secure and space-saving storage of batteries and other implements
- + With two power connections in each box (230 V sockets)
- + Sturdy steel construction with high-quality enamel coating
- + Doors hinged on the right, with sturdy swivel rod hinge
- + Convenient doorstop silencer for pleasant closing
- + All lockers feature a base
- + Usable box sizes (HxWxD): 375 x 330 x 465

## Small-compartment and safe deposit box lockers

**The specialist lockers**

- + Sturdy steel construction with high-quality enamel coating
- + Safe deposit box lockers with door reduced in size, e.g. for letter drop
- + Small-compartment lockers with two box sizes for easy adaptation to the desired use
- + Attractive locker base in black gray
- + One cylinder lock with 2 keys for each door

## Classic PLUS Compartment width: 250

**The space-savers for tight spaces**

- + Sturdy steel construction with high-quality enamel coating
- + Single- and double-tier versions
- + Break-in-resistant design as per class B according to DIN 4547-2
- + Compartment width: 250 mm
- + Reinforced doors with ventilation gills and stamped-in label holder
- + Safety turning bolt for padlock
- + Compartment bottoms can be swept out easily

**Available floor-standing, with feet or with base**

# The professionals for professionals

## Developed together with fire service professionals for fire service professionals.

**Rescue, extinguish, retrieve and protect: Together with your team, you overcome the biggest challenges day in and day out. This demands 100% professionalism—just like the storage space at your fire station.**

We've developed a series of fire service lockers which cover all your individual needs in a very flexible way. From youth firefighters to volunteers to plant firefighters, all the models have one thing in common— they're extremely rugged, highly functional, comply with all the current guidelines and look really good, too. All C+P fire service lockers can easily be combined with one another. Choose from a variety of equipment options and colors—with us, there are no limits to your dream-locker team.

**For optimum corrosion protection, all locker bottoms are zinc plated as standard.**

# Dirty/clean separation made easy and very flexible

Many fire service stations need to be modernized to guarantee legally required dirty/clean separation and therefore prevent the potential carryover of contamination. This is also one of the key stipulations for new buildings in Part 1 “Planning guidelines” of DIN 14092 “Fire service stations.” C+P fire service lockers can easily be combined with one another. Choose from a variety of equipment options and colors—with us, there are no limits to your dream-locker team.

Fire service lockers from C+P ensure that your personal protective equipment (PPE) and your street clothes are always stored well & securely and guarantee quick drying as well. Thanks to the option to combine all the different models, they can be arranged extremely flexibly in such a way that the storage room solution perfectly suits the individual requirements of your fire station and your team of firefighters. And that goes for colors, too. In addition to the classic “fire red,” a broad range of other colors are available.

# Product features and accessories well thought out in every detail

Folding helmet holder with effective ventilation function, suitable for all common EU helmet manufacturers and sizes without adjustment.

Base level adjustment as standard, optional for feet and floor-standing versions

Special combination lock with code-cover and master key functions for the secure locking of valuable objects and personal items.

For optimal corrosion protection, all locker bottoms and bases are zinc plated as standard, and the locker feet are made of plastic.

High load-capacity double sliding hooks with hanging option for adjustable partitions or hangers with a "hotel pin"

For the secure storage and quick removal of accessories: side hook rail with high load capacity and stainless steel sliding hooks.

Special drying hanger prevents clothing from being creased and accelerates drying thanks to optimal air circulation.

Maximum stability and ruggedness thanks to the use of steel and high-quality processing.

Integrated security compartment for the secure storage of valuable items like wallets and smartphones.

# The C + P professional team

## Easy to combine.

## Sturdy and practical.

### For tools and equipment

#### The cost-effective universal cabinets for warehouse and workshop

- + Sturdy steel construction with high-quality enamel coating
- + Zinc-plated shelves, drawers in light gray
- + **Ergo-Lock** grip lock (3-bolt) with 2 keys and optional exchangeable cylinder
- + Doors on bolt hinges, approx. 110° opening angle, models with drawer block have doors on external hinges, approx. 180° opening angle
- + Complete product line (different heights, dimension variants and shelf/drawer configurations for any requirement)

### With viewing windows

#### Tool cabinets with a view

- + Sturdy steel construction with high-quality enamel coating
- + Zinc-plated shelves
- + **Ergo-Lock** grip lock (3-bolt) with 2 keys and optional exchangeable cylinder
- + Doors on external hinges, approx. 180° opening angle
- + **Steel doors with viewing window made of acrylic glass for direct viewing**
- + Complete product line (different heights, dimension variants and shelf/drawer configurations for any requirement)

Loads of up to **700 kg**

## For heavy loads

### The strong cabinets for heavy loads

- + Sturdy steel construction with high-quality enamel coating
- + Zinc-plated shelves, reinforced
- + **Ergo-Lock** grip lock (3-bolt) with 2 keys and optional exchangeable cylinder
- + Doors on external hinges, approx. 180° opening angle
- + **Load capacity per shelf: 110 kg, cabinet load: 700 kg**
- + Complete product line (different heights, dimension variants and shelf/drawer configurations for any requirement)

Loads of up to **700 kg**

## For heavy loads with a viewing window

### Hard workers with a view

- + Sturdy steel construction with high-quality enamel coating
- + Zinc-plated shelves
- + **Ergo-Lock** grip lock (3-bolt) with 2 keys and optional exchangeable cylinder
- + Doors on external hinges, approx. 180° opening angle
- + **Load capacity per shelf: 110 kg, cabinet load: 700 kg**
- + **Steel doors with viewing window made of acrylic glass for direct viewing**
- + Complete product line (different heights, dimension variants and shelf/drawer configurations for any requirement)

# The patented Ergo-Lock from C+P

Outstanding operating safety, wear resistance and an attractive appearance characterize the patented “Ergo-Lock” grip lock from C+P. The **“simply push shut to close”** feature in particular already makes the work of hundreds of thousands of users easier—and soon yours, too!

## Features of the Ergo-Lock:

- + **High-quality appearance – current and contemporary**  
Fits in with any room and gives your cabinet a distinctive look.
- + **Patented “simply push shut to close” mechanism**  
Neatly close a cabinet, even if your hands are full—only from C+P.
- + **Exchangeable cylinder, subsequent replacement, simultaneous locking—it’s all possible!**  
Remain open to future change and safeguard the security of your investment.
- + **Suitable locking systems with PIN code or transponder with the same appearance.**  
Use a PIN code or transponder instead of a key with the same design if required for security purposes. As a complete, electronic offline lock, the Ergo-Lock offers full state-of-the-art features.

Whether you use it as a key lock or with PIN codes or transponders, the Ergo-Lock product range offers the right system to suit every requirement.

To Ergo-Lock →

Opt for security and access control to suit your particular needs:

### Mechanical locking system

- + 2 keys per lock
- + Standard design for all tool hinged-door cabinets (unless specified otherwise)
- + Also easy and convenient to operate with gloves

### PIN code lock

- + Motorized locking bolt
- + 4 digits
- + 4- to 8-digit codes possible
- + Optical function feedback (green/red)
- + Master key code
- + Usage range: +5 to +40°C
- + Operated with 2 standard AA batteries (alkaline)
- + Batteries last for approx. 30,000 openings or approx. 3 years

Order no.	8900-750

### Cabinets that earn money

#### Finding instead of searching saves time and money!

- + Simply brilliant: Thanks to the direct view of the cabinet contents, you eliminate tedious searching and cumbersome labeling systems. Better order is automatically kept in viewing window cabinets as well.
- + Die C + P cabinets with viewing windows pay for themselves after just a short period of time—and then they even make you money by saving time and costs!
- + They're also perfectly suited for the implementation of modern simplification and improvement concepts such as KAIZEN or CPI.

# Hinged-door cabinets

Sturdy and practical.

## As battery charging cabinets

### The versatile electrical experts

- + Sturdy steel construction with high-quality enamel coating
- + Zinc-plated shelves
- + Special e-tray, permanently installed, with integrated socket strip
- + Ergo-Lock grip lock (3-bolt) with 2 keys and optional exchangeable cylinder
- + Doors on external hinges, approx. 180° opening angle
- + Rear panel perforated for optimal ventilation, Comfort version with fan
- + Available with solid-metal doors or with viewing windows made of acrylic glass for direct view
- + Basic or Comfort variant for any equipment and electrification needs

## As hazardous substance cabinets

### The secure cabinets for storing water-polluting substances

- + Protection against high consequential costs!
- + Sturdy steel construction with high-quality enamel coating
- + Trays made of zinc-plated steel or polyethylene
- + Ergo-Lock grip lock (3-bolt) with 2 keys and optional exchangeable cylinder
- + Various dimension variants and occasional cabinets

## With open-front containers

### The top-notchers for small parts

- + Sturdy steel construction with high-quality enamel coating
- + Zinc-plated shelves
- + Ergo-Lock grip lock (3-bolt) with 2 keys and optional exchangeable cylinder
- + Open-front containers in professional quality
- + Complete product line (different heights, dimension variants and box/drawer configurations for any requirement)

# Open-front container cabinets

## Features of the open-front container cabinets:

- + Sturdy steel construction with high-quality enamel coating
- + Wide range of different dimensions and container hardware for any application
- + Door mounting bracket with approx. 110° opening angle (except for models on page 310/311 (180°))
- + Central door reinforcement for high stability
- + Highly flexible interior fitting options thanks to adjustability in 10 mm steps (except models 8931-501 and -502 (15 mm steps))
- + Load capacity per zinc-plated shelf: 70 kg
- + Load capacity per shortened shelf: 50 kg
- + Cabinet load capacity: 450 kg
- + Wall mounting is necessary for sturdy and secure positioning. The fastening method depends on the wall material. Please use screws and dowels that are suitable for the respective type of wall (not included)
- + Cabinets with drawer block, 3 drawers each with telescopic rail guide, fully extendable, 50 kg load capacity/drawer

Order no. 130276-64

Extra-large cabinets with doors on external door hinges (door opening angle of 180°)

### Ergo-Lock grip lock

Improved operation safety, wear resistance and appearance—to close the door, all you need to do is push the grip lock closed

## Features of the open-front and shelf containers:

- + Smooth internal walls and recessed grip on the rear panel
- + Stacking lugs facilitate stacking without slippage
- + The slightly roughened bottom ensures anti-slip transport on conveyor belts
- + The open-front containers are made of polypropylene (food-safe and oil-resistant from -20 to +90°C). Available in 7 practical sizes and in the cadmium-free colors of red and blue
- + Can also be fitted with protective label covers, dust covers, front panels, and carrying bars as well as vertical dividers for more better organization

### Cabinets that earn money

Finding instead of searching saves time and money!

- + Simply brilliant: Thanks to the direct view of the cabinet contents, you eliminate tedious searching and cumbersome labeling systems. Better order is automatically kept in viewing window cabinets as well.
- + Die C+P cabinets with viewing windows pay for themselves after just a short period of time—and then they even make you money by saving time and reducing costs!
- + They're also perfectly suited for the implementation of modern simplification and improvement concepts such as KAIZEN or CPI.

# Workbenches, drawer cabinets and mobile computer, measurement and testing stations

## Versatility at its best.

### Row benches

#### The flexible modular system

- + Sturdy steel construction with high-quality enamel coating
- + Welded base made of square tube
- + Loads of up to 1,000 kg
- + Cylinder lock with 2 keys
- + Secure central locking of the drawers
- + Various dimension variants and drawer blocks

### Cabinet workbenches

#### The rugged cabinets for heavy-duty purposes

- + Sturdy steel construction with high-quality enamel coating
- + Made of square tube
- + Loads of up to 1,000 kg
- + Cylinder lock with 2 keys
- + Secure central locking of the drawers
- + Level adjustment sliders under the feet
- + Various dimension variants and drawer blocks

## Drawer cabinets

### The heavy-load pros with drawers

- + Sturdy steel construction with high-quality enamel coating
- + Recessed handle bars with labeling strips
- + Ball-bearing drawer guides with full extension slide
- + Individual anti-tilt mechanism
- + Cylinder lock with 2 keys
- + Secure central locking
- + Various dimension variants and panel heights

## Mobile cabinets

### The mobile helpers

- + Sturdy steel construction with high-quality enamel coating
- + Mobile thanks to 4x 125 mm-dia. casters, 2 of which lock
- + Cable openings in the rear panel
- + Small and large cabinet for every need
- + Large cabinet with square perforation in the rear panel for ventilation

# Row workbench series 450

## Features of the row workbenches:

- + Sturdy steel construction with high-quality enamel coating
- + Welded base made of 50x50x2 mm square tube
- + The modular principle enables flexible arrangement of the drawer cabinets or workbench legs
- + Large cabinets with usable housing height of 700 mm, doors and drawers flush with housing
- + Recessed, full-length handle bars with labeling strips and transparent cover
- + Secure central locking, combination lock system available
- + Drawers with ball guide and 100% full extension slide
- + Drawers with 50 mm panel height, 70 kg load

# Shelf systems

## File shelving

### The slot-in shelving for the binder archive

- + Fast and easy to assemble boltless system
- + Shelves adjustable in 25 mm steps
- + Load capacity per shelf: 80 kg
- + Maximum bay load: 600 kg
- + Surfaces: Available zinc-plated or in light gray RAL 7035

## Boltless shelving for standard loads

### The quick-assembly shelving for standard loads

- + Fast and easy to assemble boltless system
- + Shelves adjustable in 25 mm steps
- + Load capacity per shelf: 100 kg
- + Maximum bay load:  
1,100 kg (height: 2,000 mm)  
1,650 kg (height: 2,500 mm)
- + Surfaces: Available zinc-plated or in light gray RAL 7035

## Boltless shelving for moderately heavy loads

### The right shelving for greater demands

- + Fast and easy to assemble boltless system
- + Shelves adjustable in 25 mm steps
- + Load capacity per shelf: 150 kg
- + Maximum bay load:  
1,100 kg (height: 2,000 mm)  
1,650 kg (height: 2,500 mm)
- + Surfaces: Available zinc-plated or in light gray RAL 7035

## Boltless shelving for heavy loads

**The strong shelving for heavy-duty purposes**

- + Fast and easy to assemble boltless system
- + Shelves adjustable in 25 mm steps
- + Load capacity per shelf: 230 kg
- + Maximum bay load:  
1,650 kg (height: 2,000 mm)  
2,400 kg (height: 2,500 mm)
- + Surfaces: Available zinc-plated or in light gray RAL 7035

## Long boltless shelving

**The specialists for large and heavy stored goods**

- + Fast and easy to assemble boltless system
- + Shelves adjustable in 50 mm steps
- + Load capacity per shelf: 500/400 kg  
(shelving width: 1,700 & 2,000 mm/2,500 mm)
- + Maximum bay load: 3,000 kg
- + Surfaces: zinc-plated, particle board shelves

# Boltless file shelving

## Features of boltless file shelving:

- + Boltless shelf system using frames with diagonal braces or longitudinal braces, shelves and assembly hardware
- + Set up very quickly and easily
- + Shelf height adjustable in 25 mm steps
- + High load capacity of 80 kg per shelf with evenly distributed load
- + Bay load: 600 kg
- + Available in light gray RAL 7035, coated or zinc-plated
- + Zinc-plated version: Shelf frames are delivered dismantled
- + Coated version: Shelf frames are delivered preassembled

# The patented Ergo-Lock from C+P

Outstanding operating safety, wear resistance and an attractive appearance characterize the patented “Ergo-Lock” grip lock from C+P. The **“simply push shut to close”** feature in particular already makes the work of hundreds of thousands of users easier—and soon yours, too!

## Features of the Ergo-Lock:

- + **High-quality appearance—current and contemporary**  
Fits in with any room and gives your cabinet a distinctive look.
- + **Patented “simply push shut to close” mechanism**  
Neatly close a cabinet, even if your hands are full—only from C+P.
- + **Exchangeable cylinder, subsequent replacement, simultaneous locking—it’s all possible!**  
Remain open to future change and safeguard the security of your investment.
- + **Suitable locking systems with PIN code or transponder with the same appearance.**  
Use a PIN code or transponder instead of a key with the same design if required for security purposes. As a complete, electronic offline lock, the Ergo-Lock offers full state-of-the-art features.

Whether you use it as a key lock or with PIN codes or transponders, the Ergo-Lock product range offers the right system to suit every requirement.

Opt for security and access control to suit your particular needs:

### Mechanical locking system

- + 2 keys per lock
- + Standard design for all Acurado hinged-door cabinets
- + Also easy and convenient to operate with gloves

### PIN code lock

- + Motorized locking bolt
- + 4 digits
- + 4- to 8-digit codes possible
- + Optical function feedback (green/red)
- + Master key code
- + Usage range: +5 to +40°C
- + Operated with 2 standard AA batteries (alkaline)
- + Batteries last for approx. 30,000 openings or approx. 3 years

Order no.	8900-750

### RFID transponder lock

- + Motorized locking bolt
- + Transponder type: MIFARE® DESFire®
- + Can be integrated into existing access control systems
- + USB programming interface
- + Optical function feedback (green/red)
- + Easy operation with programmable user and master cards, as well as a service card
- + Management software also available as an option
- + Usage range: +5 to +40°C
- + Operated with 2 standard AA batteries (alkaline)
- + Batteries last for approx. 30,000 openings or approx. 3 years

## Hinged-door cabinets.

### Features of the hinged-door cabinets:

- + Sturdy steel construction with high-quality enamel coating
- + Wide range of different dimensions for any application
- + With sliders for floor protection as standard
- + Shelves, coated light gray
- + Improved operating safety, wear resistance and an attractive ergonomic appearance thanks to the Ergo-Lock grip lock (3-bolt latch) in black with 2 keys
- + Doors on bolt hinges, door opening angle of approx. 110°
- + Door reinforcement for high stability
- + Highly flexible interior fitting options thanks to adjustability in 15 mm steps
- + Interesting range of counter and top solutions as well as shelving
- + High load capacity of 70 kg per shelf, reinforced shelf can bear loads up to 110 kg, for reinforcement see page 365

Order no. 9260-000

- + **Ergo-Lock grip lock**  
Improved operating safety, wear resistance and an attractive appearance thanks to the grip lock (3-bolt latch) in black with 2 keys—the door can be closed simply by squeezing the grip lock

# Asisto

## The strength and flexibility of steel in the office.

Asisto from C + P is a leading product in all areas of modern office furniture and also offers added value that is “as strong as steel” and that you can only get from C + P. The Asisto cabinets with the innovative steel body stand out thanks to their technology, design and price-performance ratio. Asisto is the intelligent complete range from the market leader in steel furniture.

### Features of Asisto hinged-door cabinets:

- + Sturdy steel construction with high-quality enamel coating
- + Appealing design thanks to narrow edges which you can only achieve with intelligently manufactured steel bodies
- + Excellent stability and suitability for moving thanks to Asisto steel body (with useful magnetic surfaces on the side)
- + Sliders for floor protection, as standard with level adjustment, adjustable from inside
- + Metal cabinet handles, matt nickel-plated
- + Shelves, coated black gray
- + 3-bolt safety lock with exchangeable cylinder, 2 keys
- + Hinged doors with approx. 225° door opening angle
- + Different fronts (steel, wood and clear glass) and tops can be matched to the steel body
- + Highly flexible interior fitting options thanks to adjustability in 15 mm steps
- + High load capacity of 70 kg per shelf
- + MCPB tops, 25 mm thick, for cabinets up to 1,635 mm in height

All units feature the narrow 6 mm edge that is characteristic for the Asisto cabinet system

The standard Asisto handles are matt nickel-plated and continue the elegant style of this product line

The adjustable hinges (opening angle of approx. 225°) are extra flat, thus allowing even better access to the cabinet interior

The Asisto level adjustment can be easily adjusted from the inside with easy access to the adjustment screw through a guide sleeve

# Asisto

## Tambour cabinets

### Features of Asisto tambour cabinets:

- + Body in sturdy steel construction with high-quality enamel coating
- + Appealing design thanks to narrow edges which you can only achieve with intelligently manufactured steel bodies
- + Excellent stability and suitability for moving thanks to the Asisto steel body (with useful magnetic surfaces on the side)
- + Sliders for floor protection, as standard with level adjustment, adjustable from inside
- + No assembly required—tambour cabinets are delivered fully assembled
- + Shelves, coated black gray
- + Hook bolt lock with exchangeable cylinders, 2 keys
- + Tambour doors consist of full-length, flexible plastic mats (polypropylene) with aluminum locking bar and metal cabinet handle, matt nickel-plated, for easy operation
- + Tambours move especially smoothly and quietly
- + Doors also available with sound-absorbing acoustic tambour
- + Highly flexible interior fitting options thanks to adjustability in 15 mm steps
- + Load capacity of 50 kg per shelf
- + MCPB tops, 25 mm thick, for cabinets up to 1,635 mm in height

**Patented acoustic tambour:**  
Absorb sound, improve acoustics—and look good doing it: The light-running, patented and award-winning special tambour absorbs a majority of the sound occurring in day-to-day work. In some frequency ranges, it “swallows” almost seven times as much sound as a conventional cabinet.

+ **Optional for all cabinets:**  
**Make the office an area of tranquility!**  
“Typical” background noise is part and parcel of the day-to-day routine in open-concept offices: Talking, clatter and ringing hamper concentration while working. All the better if you can solve this problem by utilizing the office storage you need anyway and create a healthy, pleasant working atmosphere for employees at the same time.

### Tambour cabinets for efficient office space utilization

When open, tambour cabinets always provide unobstructed access without the hindrance of doors extending into the room. This allows you to

- + fit more workstations and storage space in the room
- + or achieve a more generous appearance of your furnishings while using the same amount of space,
- + utilizing valuable office space more efficiently!

## 7100 and 7200 series Multi-drawer cabinets.

Multi-drawer cabinets from C+P know how to inspire. They can be used for just about any desired custom solution, not least thanks to their stepped horizontal and vertical dividers. Only available from C+P.

The cabinet with 10 drawers in one and the same body is another specialty from C+P, just like the trouble-free space-saving storage of up to 15 drawers (per cabinet with a height of 760 and 420 mm)—also on base and with MCPB top on request.

# 7100 and 7200 series

## Multi-drawer cabinets.

### Features of the multi-drawer cabinets of the 7000 series:

**The universal drawer cabinets for everything flat,**

e.g. drawings, plans, pictures, prints, graphics, collections, medication, small parts and lots more.

- + Sturdy steel construction with overlay drawer fronts and high-quality enamel coating
- + Many combination options thanks to optional base and top covers
- + With sliders for floor protection as standard
- + Elegant and ergonomic bow-shaped handles, matt nickel-plated
- + Central locking system with 2 keys (cylinder lock with exchangeable cylinder)
- + Drawer with self-closing system, fully (DIN A1) or 4/5 (DIN A0) extendable, with anti-tilt mechanism
- + All drawers with pressure device at the front and with cover strip at the back
- + Load capacity per drawer: 40 kg
- + Drawer bottoms are stepped and can be divided, therefore suitable for different applications
- + Available in two sizes (DIN A1 and DIN A0) and two cabinet heights with different drawer configurations
- + Per drawer: 1 transparent label holder with white label as standard

### Explanation of the interior dimensions:

Standard version

- 45 mm = Height of the drawer **pan**
- 43 mm = Internal height of the drawer **pan**
- 66/134 mm = Exterior panel height (regular/double panel height)
- 55/120 mm = Internal height of the drawer (regular/double panel height)

Version with high drawer pan and double panel height

(addtl. charge for model 7000-80, see bottom of Page 436)

- 100 mm = Height of the drawer **pan**
- 98 mm = Internal height of the drawer **pan**
- 134 mm = Exterior panel height
- 120 mm = Internal height of the drawer

# Office furniture & accessories

---

## Counters and lounge furniture

### The right furniture for THE NEW WORLD OF WORKING

The way we work is changing. Coziness and an atmosphere of well-being in the office are playing an increasingly important role. More and more, the office of today is becoming a living room where lounge and meeting furniture are supplementing the classic desk and workstation.

#### What you'll find in this section:

- + Customized solutions for reception counters
- + Basic standing tables as a "moving" meeting point
- + Asisto lounge furniture as a place to retreat to for concentrated work and informal meetings

## Tables

### The contemporary work and meeting solutions

Whether it's ergonomic sit/stand workstations or smart solutions for meetings: Contemporary office tables of today have to offer more than function and efficiency. Like tables from C+P, which come in an attractive selection of colors and decors, among other things.

#### What you'll find in this section:

- + Electric height adjustment Asisto sit/stand tables
- + Asisto occasional tables with fixed or adjustable height
- + Asisto folding tables as a mobile, nestable version
- + Basic cafeteria tables and folding tables

## Around the desk

### Welcome additions for working better

The difference is in the details! The right parameters in the work environment have a major influence on well-being and motivation—and therefore on the results of work. Whether it's the addition of thinking lighting, the acquisition of privacy sections or optimization of the monitor position: These investments always pay off.

### What you'll find in this section:

- + Workstation dividers
- + Asisto light with active brightness control
- + Asisto monitor holders

## Chairs and stools

### The ergonomic swivel and task chairs

Healthy and pleasant sitting isn't just a decisive factor at the workplace. Chairs which not only look good, but also enable comfortable sitting, are also needed at meetings & seminars, for visits and for meetings at the office counter.

### What you'll find in this section:

- + Basic workstation swivel chair
- + Asisto office swivel chair with 3D knitted membrane
- + Basic and Asisto visitor chairs
- + Basic and Asisto stackable chairs
- + Bar stools

## Cabinets, pedestals and caddies

### The experts for storage space and flexible catering near the workstation

Everything at hand and in the right place in the right pull-out cabinet or pedestal: Naturally, made of steel with long-lasting and convenient pull-outs, nearly unlimited color variety and an impressive appearance and technology. This also applies for C+P fridge caddies, which provide perfect service in the conference area.

### What you'll find in this section:

- + Asisto pull-out cabinets at standing and sitting height
- + Asisto mobile pedestals
- + Asisto fridge caddies

## Reception counter

# Design meets function and expression.

The reception counter is the first piece of furniture at your company that people see. That's why it's all the more important that you design this area in line with your tastes and your company's image. C+P has an extensive portfolio:

- + Reception solutions for every need
- + Stylish business cards for the entrance area of any company
- + Also for clinics, institutes, public facilities and lots more
- + Available in a wide variety of different surfaces, colors and versions
- + Made of sturdy and high-quality materials

Whether it's light or dark, modern or timeless: The choice is yours, and you'll be delighted at how your new counter influences the effect of the space and creates a positive impression.

**Ask us about your customized reception counter—we look forward to handling your task!**

# Basic

## Standing tables.

**The Basic standing table keeps the body in motion and the thoughts flowing.**

Basic—keeps the body in motion and the thoughts flowing. Meetings held standing are generally shorter and thereby promote work efficiency.

For short meetings, an exchange of ideas, brainstorming, collecting information or a coffee break, the Basic standing table makes communication zones possible in large offices.

- + Sides and tabletop are always made of sturdy 38 mm-thick panels
- + All surfaces are coated with high-quality, durable HPL
- + Sides each feature 2 floor-compensating adjustable feet for easy leveling
- + Connection between side and tabletop with 5 mm shadow gap in silver
- + Delivered disassembled with easy assembly instructions
- + **The decor of the work top is your choice, and the side & connection crossbar are always diamond white**

# Asisto Lounge.

## Features of the Asisto lounge sofas:

- + Ideal supplement for the reception, lounge or central zone
- + Currently available as a sofa and highback in 3 widths
- + 5 materials from the FENICE collection can be combined

The way we work is changing. On the one hand, day-to-day work is getting faster all the time and requirements on each individual are increasing. On the other hand, coziness and an atmosphere of well-being play an important role at the office. Relaxation and the ability to retreat are utilized to develop new energies and creativity.

More and more, the office of today is becoming a living room where lounge and meeting furniture are supplementing the classic desk and workstation.

The Asisto lounge offers a visual and acoustic space to retreat to for concentrated work.

Price

The smart lamp system of the Asisto series complements the ergonomic workstation.

Newly developed active Luminosity Range Control ensures that the illumination angle and the illumination values are automatically adapted to the working height of sit/stand tables. Customized light scenes set by the user are retained at each table height.

LEDs of the lamp head are dimmed depending on the table height. This means that your eyes don't have to adjust to changing lighting conditions, but rather that the lighting conditions adjust to your eyes.

The light shines both up (indirect) and down. Dimmable adjustment is made using the display

A spotlight function for continuous constant light is integrated and can be selected using the operating panel

#### Smart cable duct

All connecting cables are routed neatly and protected under the unobtrusive cover. The powerful gas lift element for top-notch ease of operation is also found here.

#### Quick release

Monitors can easily be inserted or changed by one person by hand without any tools at all. The holder fits all common monitors with the 75 x 75 and 100 x 100 attachment standard.

#### Sturdy joint technology

The high-quality pivot joint is considerably flatter than a conventional ball joint, so it offers nearly unlimited freedom of movement in every turn and tilt direction. Large monitors can also be effortlessly handled and remain securely in the set position.

#### 3-in-1 table attachment

The standard attachment element can be conveniently secured from above and covers three mounting types in one: clamp, cable opening and drill hole attachment. It offers optimal flexibility should the attachment type be changed.

# Basic

## Workstation swivel chair.

### Features of the Basic office workstation chair:

- + Office swivel chair with load-dependent braked casters
- + Attractively shaped plastic base in black
- + Integrated synchronous mechanism for seat and backrest, 4 locking positions
- + Body weight adjustment in the mechanism between 45 and 120 kg
- + Functional seat depth adjustment (adjustment range: 50 mm)
- + Backrest with net fabric
- + Armrest height and depth adjustable in 3D
- + Height-adjustable lumbar support

#### The 3D knit membrane

This is precisely fit to the backrest and seat. It's various back zones are designed in such a way that the flexible functions of the backrest are optimally supported. In the lumbar area, it features greater tension than in the shoulder area, forming a perfect symbiosis together with the back design for comfortable sitting. The 3D knit membrane also contributes to sustainability.

## A

A brief portrait of C+P	8–9
Acoustic tambour, Asisto	408–411
Acurado cabinet systems	360–373, 388–395, 416–419
Acurado drawer and filing cabinets	416–419
Acurado hinged-door cabinets	360–373
Acurado sliding-door cabinets	388–395
Asisto desks	446–447
Asisto drawer and filing cabinets	420–431
Asisto fridge caddy	474–475
Asisto hinged-door cabinets	374–382
Asisto occasional tables	448–449
Asisto pull-out cabinets	470–471
Asisto sit/stand tables	446–447
Asisto sliding-door cabinets	396–399
Asisto tambour cabinets	408–413
Assembled box lockers	80–85, 134–143, 176–179, 192–205, 206–213
Assembled box lockers with acrylic glass doors	198–199

## B

Bar stools	468–469
Basic benches and benches with coat rack	224–227
Basic benches with coat rack	224–227
Battery charging cabinets	298–299
Benches and benches with coat rack	220–231
Benches, stackable	222–223
Benches with coat rack for wet rooms	228–231
Binder supports	373, 381, 394, 398, 407, 412
Boltless file shelving	342–343
Boltless long shelving units	350
Boltless shelving	340–351

## C

C+P added value	4–7
C+P cleaner	23
Cabinets with hinged doors (office)	356–385
Cabinets with hinged doors (workshop)	262–279, 280–295, 296–311
Cabinets with tambour doors	400–413
Cabinets with tambour doors (Asisto)	408–413
Cabinets with tambour doors (Omnispace)	402–407
Caddy with trash can	474–475
Cafeteria tables	452–453
Cambio lockers	166–185
Card-index cabinets	416–431
Certos hinged-door cabinets, flame-resistant	382–385
Chairs	460–469
Changing room rails	225, 231, 234
Changing room systems	232–241
Changing room systems and assembled box lockers	236–241
Classic PLUS accessories	94–97
Classic PLUS lockers	60–97
Classic PLUS top lockers (changing room)	86–87

Comfort benches with coat rack (HPL)	228–231
Compartmentalized loading lockers	252–253
Computer cabinets	337
Conference chairs	464–467
Conference solutions	450–453
Conference tables	450–453
Contents	3
Corrosion protection and quality assurance	22
Counters	440–441

## D

Decor concept	50–53
Decor tables	51, 53
Delivery conditions	20–21
Desks, Asisto	446–447
Dirty/clean separation lockers	64–65, 70–73, 114–123
Dispensing lockers for laundry	250
Double-tier lockers	76–79, 126–133, 174–175, 195–196, 203, 205, 210–211
Drawer cabinets (office/archive)	414–437
Drawer cabinets (workshop)	333–336
Drawing cabinets for horizontal storage	432–437
Drying and ventilation (lockers)	170–171, 190–191
Drying lockers, Flex PLUS	190–191

## E

Electronic locking systems	162–163, 214–218, 265, 359
Ergo-Lock grip lock	264–265, 358–359
EURO-LOCKS PIN code lock	162–163, 216
EvoLo PLUS accessories	154–157
EvoLo PLUS lockers	98–157
Exhaust air ventilation system for lockers	170–171
Extra-large assembled box lockers	196–197, 210–211
Extra-large assembled box lockers with acrylic glass doors	198–199
Extra-large tool cabinets	267

## F

Filing cabinets	416–423, 416–431
Fire service lockers	244–249
Flame-resistant cabinets	382–385
Flex PLUS drying lockers	190–191
Floor lamps	456–457
Folding tables	450–453
Free-standing wardrobes	235
Fridge caddy, Asisto	474–475

## G

Gantner, electronic locking systems	214–215
Green walls	42–43

## H

Hangers for changing room systems	95
Hanging cabinet/Hanging shelf	274
Hazardous substance cabinets	300–301
Hedge elements	42–43
Hinged-door cabinets, flame-resistant	382–385

Hinged-door cabinets for heavy loads	288–295
Hinged-door cabinets (office)	356–385
Hinged-door cabinets with viewing window doors	284–287, 292–295
Hook assortments	338–339
Horizontal storage cabinets	432–437

## I

Intro assembled box lockers	194–201
-----------------------------	---------

## K

Kindergarten lockers	202–203
----------------------	---------

## L

Labels for multi-drawer cabinets	437
Lamps	456–457
Laptop lockers	251
Laundry bags	250
Laundry collection locker	250

## General information

This publication is for informational purposes. It does not constitute a quotation as defined by law and is only intended for business customers. All items are supplied without any decorations shown in the illustrations. The trademark and product rights of any branded products which may appear in the decorations are reserved by the respective manufacturer. The specified dimensions are only approximate and may be larger or smaller. We reserve the right to make structural changes, changes to the assortment & availability and changes to the color, material & decor ranges, as well as to limit express availability if necessary (e.g. in case of larger quantities of a model or order).

All previous catalogs and price lists become invalid as of the publication of this catalog. All pricing information represents non-binding price recommendations from the manufacturer, does not include the value added tax applicable on the day of delivery and is intended for commercial customers. We reserve the right to make changes to pricing information, e.g. due to errors or increases in the price of raw materials or other materials.

Our General Terms and Conditions of Business apply (see [www.cp.de/agb](http://www.cp.de/agb)).

Issued: August 2023 - 1688742607 - Valid from October, 2023 until the publication of a new issue.
